ARRESTS AS GUILT

Anna Roberts

An arrest puts a halt to one's free life and may act as prelude to a new process. That new process—prosecution—may culminate in a finding of guilt. But arrest and guilt—concepts that are factually and legally distinct—frequently seem to be fused together. This fusion appears in many of the consequences of arrest, including the use of arrests in assessing "risk," in calculating "recidivism," and in identifying "offenders." An examination of this fusion elucidates obstacles to key aspects of criminal justice reform. Efforts at reform, whether focused on prosecution or defense, police or bail, require a robust understanding of the differences between arrest and guilt; if they run counter to an implicit fusion of the two, they will inevitably falter.

INTRODUCTION

Approximately eleven million arrests are made in this country per year. Some arrests lead to prosecutions, some do not; some prosecutions lead to convictions, some do not. Some arrests—let us assume—correspond to crime commission, some do not. Thus, an arrest does not connote legal guilt

* Associate Professor, Seattle University School of Law; Visiting Associate Professor, St. John's University School of Law (2018–2019); Professor of Law, St. John's University School of Law (2019–). Finally, my thanks to the members of the Alabama Law Review for their excellent editorial work.

2. Surell Brady, Arrests Without Prosecution and the Fourth Amendment, 59 MD. L. REV. 1, 3 (2000) ("In a number of large jurisdictions, the majority of criminal cases at the state level, both misdemeanors and felonies, are dismissed without prosecution.").
4. See infra Subpart I.A.
or factual guilt, nor is it supposed to. It is supposed merely to be supported by “probable cause,” a standard that is relatively low and that does not require an adjudication of guilt. This standard is applied on the assumption that things like exculpatory information and defenses are for a later time.

And yet, in a wide range of ways, in a wide range of contexts, and in the assumptions of a wide range of people, arrests appear to be fused with guilt. The stage that is supposed to lie between arrest and adjudication—that period of diligent investigation, zealous representation, exploration of defenses, and possible dismissal—has too often collapsed in our implicit, and sometimes explicit, understandings of the criminal legal system. This fusion appears in consequences of arrest; discussions of “recidivism” and assessments of “risk” that seem to treat an arrest as equivalent to guilt; and linguistic and statistical “slips” that confuse “offenders” with arrestees and “crimes” with alleged crimes.

Given the many differences—factual and legal—between arrest and guilt, such a fusion demands explanation and critique. In addition, its potential consequences need to be identified and resisted.

Part I lays out key ways in which arrests are distinct from guilt, whether factual guilt (commission of the crime charged) or legal guilt (conviction for the crime charged). Part II identifies a number of manifestations of an apparent fusion of arrest and guilt. Part III explores how the fusion of arrest and guilt might have come about, discussing the influences of plea-bargaining, diversionary programs, and media, as well as the desire to comfort ourselves that our criminal legal system makes sense and does justice—or at least isn’t unjust nonsense.

Part IV identifies one crucial set of reasons why such a fusion matters. Vital reform of the criminal legal system relies on a robust understanding of the

5. See Kenneth J. Melilli, Prosectorial Discretion in an Adversary System, 1992 BYUL Rev. 669, 680–81 (“Probable cause is little more than heightened suspicion, and it is not even remotely sufficient to screen out individuals who are factually not guilty.”); Alexandra Natapoff, Misdemeanors, 85 S. Cal. L. Rev. 1313, 1349 (2012) (describing probable cause as “a standard which demands less than a preponderance of the evidence, and which ‘means less than evidence which would justify condemnation’” (quoting Illinois v. Gates, 462 U.S. 213, 235 (1983))); id. (“[A]n innocent person can be legally arrested, sail through the weak screening processes of the prosecutorial and public defender offices, go to jail, and succumb to the pressure to plead guilty, all based on no more than a probability (less than a fifty-fifty chance) of guilt. It is precisely by rolling back the evidentiary checking mechanisms which ensure both accuracy and transparency that the system effectively permits criminal convictions on such thin bases.”); William Ortman, Probable Cause Revisited, 68 Stan. L. Rev. 511, 559 (2016) (“Probable cause to arrest . . . does not require the fine resolution of conflicting evidence that a reasonable-doubt or even a preponderance standard demands.” While some states use a stricter formulation of probable cause, many others accord with federal law. When a 1981 survey of judges asked respondents to reduce ‘probable cause’ to a specific probability, moreover, the average was 45.78%.” (footnote omitted) (quoting Gerstein v. Pugh, 420 U.S. 103, 121 (1975)));

6. See Kruze v. Bennett, 887 F.2d 362, 372 (2d Cir. 1989); Natapoff, supra note 5, at 1349 (describing the probable cause standard as requiring “less than a fifty-fifty chance( ) of guilt.”);

7. See Faigen v. Marshall, 574 F.3d 57, 63 (2d Cir. 2009) (rejecting the idea that “an officer must have proof of each element of a crime and negate any defense before an arrest.”).
difference between arrest and guilt. If this distinction has indeed collapsed, even for those committed to criminal justice reform, an array of perhaps otherwise puzzling failures of reform—in areas that include defense representation, prosecutorial conduct, police conduct, and preadjudication suffering—may make more sense. Exposing this fusion is a necessary first step toward a new stage of reform.8

I. ARRESTS ≠ GUILT

Whether one is concerned primarily with “factual guilt” or with “legal guilt,” an arrest is, of course, quite distinct from guilt. While definitions of both “factual” and “legal” guilt are myriad,9 this Part lays out a working definition of each, before discussing the multiple ways in which each differs from arrest.

A. Arrests ≠ Factual Guilt

While alternative definitions will be discussed below,10 this Article describes someone as “factually guilty” regarding Crime X if she committed Crime X.11 In other words, to be factually guilty of Crime X, each of the elements of Crime X must be satisfied (including actus reus and mens rea requirements), and there must be no defense that negates guilt.12 While selecting this definition removes some complications,13 it leaves one large one. Since there is sometimes no definitive answer to the question “Did she commit the crime?”, it will sometimes be impossible to resolve the question of factual guilt.14 For example, there may be no definitive answer to the question of

10. See infra Subpart III.C.
11. See John Lawrence Hill, What Does it Mean to Be a “Parent”? The Claims of Biology as the Basis for Parental Rights, 66 N.Y.U. L. Rev. 353, 362 n.28 (1991) (“[T]he term ‘guilty’ is used to denote both individuals who have committed a crime, whether or not they are convicted—this is ‘factual guilt’—and those who are convicted of a crime, even if they did not in fact commit the crime—‘legal guilt.’”).
12. See, e.g., Shapiro, supra note 9, at 44 (“For me, factual guilt embraces the questions whether the accused committed the acts with which he is charged and whether he committed them with the requisite mens rea and without legal justification.”).
13. See infra Part I.B.
14. Or, as John Mitchell puts it, “[t]here are cases where factual and legal guilt merge. You may know all the facts in a self-defense case, but whether the defendant was ‘reasonable’ or not in employing the force he did will be a conclusion of the trier of fact. On the other hand, whether he was ‘reasonable’ will be central to the question of his factual guilt.” The Ethics of the Criminal Defense Attorney–New Answers to Old Questions, 32 Stan. L. Rev. 293, 297 n.12 (1980); see also Gary Goodpaster, On the Theory of American Adversary Criminal Trial, 78 J. Crim. L. & Criminology 118, 130 (1987) (“[T]he kind of historical fact with which the law is concerned may not even exist in any meaningful way independent of the method of
whether someone was “reasonable” in using force in self-defense. This caveat does not alter the fact that there are several reasons why an arrest does not equal factual guilt.

First, an arrest is at its core a governmental act, rather than the act of a suspect; its occurrence, therefore, cannot in and of itself establish that a suspect is guilty of anything. (Of course, an arrest is generally claimed to be made in response to a suspect’s act, but that is a different thing.) While this point may seem obvious, that it needs to be made is suggested by the many contexts—discussed below—in which an arrest is portrayed as the act of a suspect.

Second, even if we view an arrest as a response to a suspect’s alleged act, an act is rarely sufficient to establish factual guilt. Recall that factual guilt is defined here as commission of a crime, and recall that in our legal system crimes generally require, in addition to particular acts (or omissions), other elements such as mental states, and also require the absence of successful defenses. An arrest may speak to law enforcement’s assertion vis-à-vis an alleged act (and allegations about alleged acts may suffice to establish probable cause), but that falls far short of a demonstration of factual guilt.

See Jessica M. Eaglin, Constructing Recidivism Risk, 67 Emory L.J. 59, 94 (2017) (“Arrest is an action taken by police officers under authority of the state.”).
See Kohler-Hausmann, supra note 3, at 630 (“We can never directly interpret arrest rates as an index of underlying criminal behavior because reporting and police practices mediate criminal events and arrests.”).
See infra notes 124–42 and accompanying text.
See, e.g., Michelson v. United States, 335 U.S. 469, 482 (1948) (“Arrest without more does not, in law any more than in reason, impeach the integrity or impair the credibility of a witness. It happens to the innocent as well as the guilty.”).
See Alexandra Natapoff, Agregation and Urban Misdemeanors, 40 Fordham Urb. L.J. 1043, 1052 (2013) (mentioning the mens rea requirement that exists “in all but a handful of cases”).
See Adam M. Gershowitz, Prosecutorial Dismissals as Teachable Moments (and Databases) for the Police, 86 Geo. Wash. L. Rev. 1525, 1526 (2018) (“Police observe what they believe is criminal conduct, and the officers make the decision on the spot whether to arrest the individual.”).
See Marks v. Carmody, 234 F.3d 1006, 1009 (7th Cir. 2000) (“Issues of mental state and credibility are for judges and juries [and not police officers] to decide.”) (first citing Spiegel v. Cortese, 196 F.3d 717, 725 (7th Cir. 1999); and then citing Hebron v. Touhy, 18 F.3d 421, 423 (7th Cir. 1994)); Tillman v. Wash. Metro. Area Transit Auth., 695 A.2d 94, 95–97 (D.C. 1997); Josh Bowers, Punishing the Innocent, 156 U. Pa. L. Rev. 1117, 1161 (2008) (“Petty charges often stem from police observation of supposed crime, not police investigation of crime reports. If the defendant is innocent, it is frequently because the police saw something and wrongly assumed that it was criminal.”) (footnote omitted)), id. at 1161 n.224 (“Petty charges often stem from police observation of supposed crime, not police investigation of crime reports. If the defendant is innocent, it is frequently because the police saw something and wrongly assumed that it was criminal.”) (footnote omitted)).
Third, factors other than a belief in guilt incentivize police officers to arrest.\textsuperscript{23} Law enforcement officers may experience pressure—external and/or internal—to increase the volume of their arrests for job advancement (or job preservation).\textsuperscript{24} Arrests can also bring other financial benefits, whether by allowing officers to claim overtime pay\textsuperscript{25} or to seize property by means of civil forfeiture,\textsuperscript{26} or by increasing agency revenue.\textsuperscript{27} In addition, arrests may offer a passing is the clearest example. Usually, if the defendant is innocent, it is because she had permission to be at the location, not because another individual trespassed.

\textsuperscript{23} See Alicia M. Hilton, A Narrative to the Exclusionary Rule and Hudson v. Michigan: Preventing and Remediating Police Misconduct, 53 VILL. L. REV. 47, 70–71 (2008); K. Babe Howell, Prosecutorial Discretion and the Duty to Seek Justice in an Overburdened Criminal Justice System, 27 GEO. J. LEGAL ETHICS 285, 293 (2014) ("The pressure on police to exercise discretion to make arrests for minor offenses, such as enjoying a beer on one’s own stoop on a summer evening, has significantly increased the number of individuals in the lower criminal courts that the public might deem to be normatively innocent."); id. at 318 n.181 (discussing pressures on police to meet quotas).

\textsuperscript{24} See Gershowitz, supra note 21, at 1532 ("[P]olice sometimes make warrantless arrests for their own benefit. Police departments track arrest statistics to prevent officers from ducking work and wasting their shifts. Officers therefore might arrest an individual to improve their arrest numbers.").

\textsuperscript{25} See id. at 1532–33 ("In some jurisdictions, because police officers are paid overtime for appearing in court, they have an incentive to make arrests that will lead to court pay. One prosecutor (who wished to remain anonymous) explained that some police officers are more prone to arrest if they think they will be paid overtime to testify in court, even if the case is weak." (footnote omitted)); Rachel A. Harmon, Why A rant?, 115 MICH. L. REV. 307, 360 (2016) (stating that police departments “use arrest numbers as a measure of productivity and a basis for overtime pay”).

\textsuperscript{26} See Jain, supra note 8, at 819 ("Arrests can... give police officers the opportunity to respond to incentives that have little to do with crime control—such as seizing property through civil forfeiture laws or responding to arrest quotas.""). Note that forfeiture can occur even when there has been no arrest, see Scott Rodd, Should Police Be Allowed to Keep Property Without a Criminal Conviction?, PEW CHARITABLE TRS. (Feb. 8, 2017), http://www.pewtrusts.org/en/research-and-analysis/blogs/stateline/2017/02/08/should-police-be-allowed-to-keep-property-without-a-criminal-conviction, but an accusation of criminal wrongdoing may serve to justify such forfeiture, see Vida B. Johnson, Bias in Blue: Instructing Jurors to Consider the Testimony of Police Officers Wisely with Caution, 44 PEPP. L. REV. 243, 289–90 (2017).

\textsuperscript{27} See Leonard v. Texas, 137 S. Ct. 947, 948 (2017) (Thomas, J., dissenting from denial of certiorari) (observing that many states, and the federal government, allow law enforcement to keep 100% of the value of forfeited property); Karena Rahall, The Green to Blue Pipeline: Defense Contractors and the Police Industrial Complex, 36 CARDOZO L. REV. 1785, 1800 n.103 (2015) (stating that certain federal grants were awarded to police departments “based entirely on the number of drug arrests made by each department and drug arrests skyrocketed as a result”); Michelle Alexander, Opinion, Why Police Lie Under Oath, N.Y. TIMES (Feb. 2, 2013), http://www.nytimes.com/2013/02/03/opinion/sunday/why-police-officers-lie-under-oath.html (“In the war on drugs, federal grant programs like the Edward Byrne Memorial Justice Assistance Grant Program have encouraged state and local law enforcement agencies to boost drug arrests in order to compete for millions of dollars in funding. Agencies receive cash rewards for arresting high numbers of people for drug offenses, no matter how minor the offenses or how weak the evidence."); Derek Draplin & Kahlry Riley, Opinion, Innocent Until Proven Guilty: Why Should We Trust it Says, USA TODAY (Mar. 10, 2017), https://www.usatoday.com/story/opinion/2017/03/10/civil-asset-forfeiture-michigan-police-column/98522526/ (noting, regarding civil asset forfeiture, that “[m]ost states allow law enforcement to keep at least 45% of the value of forfeited property, while in Michigan police get to keep up to 100%”); Shelby Gird, Ferguson, No’s, A Leged Revenue Snaps Edo in Southeast L.A. County, L.A. TIMES (Mar. 5, 2015, 9:11 AM), http://www.latimes.com/local/lanow/la-me-ln-ferguson-missouri-abuses-echo-southeast-los-angeles-county-20150305-story.html (describing the Ferguson Police Department’s use of arrests as a “revenue-generating scheme”).
way to control a situation, conduct searches, give new recruits experience and training, or collect pedigree information for future investigations. Perhaps, one might respond, these incentives exist but have no impact; after all, for them actually to bring about arrests might require police officers to lie. Unfortunately, however, it does appear that police officers sometimes lie, even or especially about important things like probable cause, and that such lies may be encouraged or enabled by the work environment and legal system, in which they operate. A police statement can be sufficient support for an arrest; evidence of police falsity helps to undermine the notion that an arrest establishes factual guilt.

Finally, while it is impossible to quantify the number of people who have been arrested in the absence of factual guilt, we know that there are at least some. We also know that many arrests do not lead to convictions. Indeed,

28. See, e.g., Josh Bowers, Legal Guilt, Normative Innocence, and the Equitable Decision Not to Prosecute, 110 COLUM. L. REV. 1655, 1701 (2010) (“[T]he officer may have made the arrest only to further some ostensible objective. (In which case, the officer already may have extracted the full value of the arrest once the arrestee has been processed fully through central booking.)” (footnote omitted)).

30. See id. at 1695.

31. See id.

32. See Morgan Cloud, The Dirty Little Secret, 43 EMORY L.J. 1311, 1348 (1994) (cataloging multiple reasons why the problem persists); Julian Darwall & Martin Guggenheim, Funding the People’s Right, 15 N.Y.U. J. LEGIS. & PUB. POL’Y 619, 637 (2012) (“Articles, studies, legal decisions, and investigative commissions have detailed problems of police misconduct and falsifications. . . . Police officers frame suspects by planting drugs on them or fabricating evidence; assault individuals and then cover their crimes by arresting the victims and falsely accusing them of crimes; and arrange to have evidence falsified in crime laboratories.”); Stanley Z. Fisher, “Just the Facts, Ma’am”: Lying and the Omission of Exculpatory Evidence in Police Reports, 28 NEW ENG. L. REV. 1, 12–17 (1993) (cataloging multiple kinds of police lies); Andrew J. McClurg, Good Cop, Bad Cop: Using Cognitive Dissonance Theory to Reduce Police Lying, 32 U.C. DAVIS L. REV. 389, 417 (1999) (“American law is rife with examples of criminal injustice attributable to police falsification.”). Note that police perjury happens often enough that the phenomenon has its own name: testifying. See, e.g., Kate Levine, How We Prosecute the Police, 104 GEO. L.J. 745, 763 (2016).

33. See, e.g., Fisher, supra note 32, at 16 & n.73; Alexander, supra note 27; Peter Kane, Opinion, Why cops lie, SFGATE (Mar. 15, 2011), https://www.sfgate.com/opinion/openforum/article/Why-cops-lie-2388737.php (“Police officer perjury in court to justify illegal dope searches is commonplace. One of the dirty little not-so-secret secrets of the criminal justice system is undercover narcotics officers intentionally lying under oath. It is a perversion of the American justice system that strikes directly at the rule of law. Yet it is the routine way of doing business in courtrooms everywhere in America.”).

34. See Daniel Givelber, Meaningless A quittals, Meaningful Convictions: Do o We Really A quit the Innocent?, 49 RUTGERS L. REV. 1317, 1345 n.87 (1997) (“[I]t is at least arguable that lying on the part of police in drug cases reflects the combination of the radical criminalization of drug offenses, racial bias, and a culture of policing which protects, rather than exposes, miscreants within the force.”); Alexander, supra note 27 (“[T]he police have a special inclination toward falsification, . . . [and] disturbingly, they have an incentive to lie.”).

as Issa Kohler-Hausmann puts it, in some contexts “arrest without conviction is not only possible, but is the norm.” Legal guilt is an imperfect proxy for factual guilt, but it is the primary proxy that we have, as the next Subpart will discuss.

### B. Arrests ≠ Legal Guilt

Legal guilt is defined in this Article as a procedurally valid conviction. Our system for determining legal guilt, which sets up various processes and protections that must be honored in order to permit a valid declaration of legal guilt, is the primary proxy that we have for factual guilt. For all its imperfections, it is the best that we currently have. Only an all-seeing, all-knowing system bears the burden of discovering the truth, but our imperfect system is the best that we currently have.

(Aug. 18, 2014), https://www.wsj.com/articles/as-resent-records-rise-americans-find-consequences-can-last-a-lifetime-1408415402 (stating that 47% of those arrested are not convicted).

39. See Bowers, supra note 28, at 1170–71 (“Courts have allowed defendants to plead guilty to daytime burglaries to satisfy lesser charges, even when the crimes indisputably occurred in dark of night. Courts have upheld pleas to ‘hypothetical crimes’ that exist in no penal code and require impossible mens rea.” (footnote omitted)); Research Working Grp., Preliminary Report on Race and Washington’s Criminal Justice System, 35 SEATTLE U. L. REV. 623, 671 (2012) (“Arrest and conviction rates do not correlate precisely with criminal behavior rates and cannot serve as a proxy for criminality.”); Irene Merker Rosenberg & Yale L. Rosenberg, Guilt: Henry Friendly Meets the MaHaRaL of Prague, 90 MICH. L. REV. 604, 613 (1991) (“Factual guilt has always seemed elusive. The best one can do in a criminal trial is to approximate truth, and only rather grossly at that.” (footnote omitted)); id. at 624–25 (“[I]n our imperfect world there is only one kind of ascertainable guilt, and that is legal guilt. The search for more is nothing less than arrogance.” (footnote omitted)); Carla Spivack, Killers Shouldn’t Inherit from Their Victims—Or Should They?, 48 GA. L. REV. 145, 204–05 (2013) (“[P]lea bargaining is commonly acknowledged to be a flawed proxy for actual guilt.”).

40. See William J. Genego, The New Adversary, 54 BROOK. L. REV. 781, 844 (1968) (under the concept of “legal guilt,” a person “is deemed to be guilty only after the state establishes this fact by meeting all the procedural demands of the system”); William S. Laufer, The Rhetoric of Innocence, 70 WASH. L. REV. 329, 331 n.4 (1995) (“If convicted, whether factually guilty or not, one is legally guilty.”); Stefano Maffei & David Sonenshin, The Cloak of the Law and Fruits Falling from the Poisonous Tree: A European Perspective on the Exclusionary Rule in the Gäfgen Case, 19 COLUM. J. EUR. L. 21, 24 n.11 (2012) (“A person may be factually guilty, in that he actually committed the crime, but at the same time not be legally guilty, because the conviction was obtained in violation of the law.”); Mykola Sorochinsky, Presenting Torturers, Protecting “Child Molesters”: Toward a Power Balance Model of Criminal Process for International Human Rights Law, 31 MICH. J. INT’L L. 157, 166 (2009) (“The pronouncement of legal guilt is only possible where there is not only a factual finding supporting the guilt, but where this finding is also made through proper procedures.”).

42. See Keith A. Findley, A D servarial Inquisitions: Rethinking the Search for the Truth, 56 N.Y. L. SCH. L. REV. 911, 912 (2011–2012) (“If one were asked to start from scratch and devise a system best suited to ascertaining the truth in criminal cases, and to ensuring that, to the extent any unavoidable errors in fact-finding occur, they do not fall on the shoulders of innocent suspects, what would that system look like? It is inconceivable that one would create a system bearing much resemblance to the criminal justice process we now have in the United States.”); Russell M. Gold et al., Civilizing Criminal Settlements, 97 B.U. L. REV. 1607, 1610 (2017) (“The lack of procedures regulating plea negotiations means that the criminal system cannot effectively sort the innocent from the guilty during those negotiations. And the extremely high punishments
knowing entity could speak with absolute accuracy and authority on factual
guilt,43 and as mentioned earlier,44 even she would be unable to provide a de-
finitive answer regarding certain charges that have an inescapably subjective
component.45 As with factual guilt, there are several ways in which an arrest is
distinct from legal guilt.

First, a finding of legal guilt requires different—and more elaborate—
process than does an arrest. At trial, a declaration of legal guilt comes from a
guilty verdict reached by judge or jury.46 Far more commonly, it is declared by
a judge, as a result of a guilty plea.47 Arrests, by contrast, are typically effected
by police officers and typically require advance approval by neither judges nor
prosecutors.48

These different processes bring with them different standards. An arrest
is not supposed to occur unless law enforcement has probable cause to be-

imposed after conviction sometimes lead innocent defendants to plead guilty to avoid the risk of receiving
those high sentences.”); Eugene R. Milhizer, Confessions A n Evidentiary Solution for Exculding
Unreliable Confessions, 81 TEMP. L. REV. 1, 9 (2008) (“While the data varies somewhat from study to study,
the consistent conclusion of the research is that innocent defendants are convicted with disturbing frequen-
cy.”); Herbert L. Packer, Two Models of the Criminal Process, 113 U. PA. L. REV. 1, 47 (1964) (“It seems clear
both as a matter of logical inference and of demonstrable fact that a defendant who is out on bail and who
enjoys the services of a lawyer is less likely to plead guilty than is one who lacks one or both of these ad-
vantages.”); Donald H. Zeigler, H armonizing Rule 609 and 608(b) of the Federal Rules of Evidence, 2003 UT A H
L. REV. 635, 689 n.297 (“Guilty pleas may be coerced by threatening lengthy incarceration or high bail if a
defendant asserts her innocence, while offering a short sentence or even probation if the defendant pleads
guilty.”).

48. See Jain, supra note 8, at 854 (“An arrest needs only a single police officer’s determination of
probable cause.”); Gershovitz, supra note 21, at 1531 (“Police officers are not legally trained and thus may
not understand that prosecutors will be unable to prove an element of the offense.” (footnote omitted)); id.
at 1527 (“Even if we assume that most police officers are well intentioned—which I do—they are not
infallible in deciding whom to arrest. Police receive very little legal training about their state’s criminal
code. And officers rarely consult with prosecutors at the moment of arrest to ask whether it will be feasible to
successfully prosecute the individual who is being arrested. Put simply, police are offered little guidance on
arrests and must exercise their best judgment in determining whom to take into custody and whom to send
on their way.” (footnotes omitted)).
lieve that the suspect committed a crime.\textsuperscript{49} This standard is a relatively low one.\textsuperscript{50} Those applying it, for example, may disregard exculpatory evidence.\textsuperscript{51} Arrests differ still further from legal guilt in that many arrests fail to meet even the relatively low standard of probable cause.\textsuperscript{52}

By contrast, trial convictions are not supposed to occur unless the fact-finders are convinced of the defendant's guilt beyond any reasonable doubt; at trial, the defense has the right not only to challenge the prosecution's ability to prove one or more of the elements but also to mount affirmative defenses. As for the guilty plea, while it does not require proof beyond a reasonable doubt,\textsuperscript{53} it requires more than an arrest does. For example, a court is not supposed to accept a guilty plea unless it is "supported by a factual basis and . . . the defendant's waiver of her right to trial is voluntary and knowing."\textsuperscript{54} A guilty plea also typically involves an admission of guilt.\textsuperscript{55}

This difference in process and standards corresponds to a difference in permissible consequences: punishment can follow a finding of legal guilt but cannot follow a mere arrest.\textsuperscript{56} After arrest, there are necessary precursors to a

\textsuperscript{50} See sources cited supra note 5.

\textsuperscript{51} See Criss v. City of Kent, 867 F.2d 259, 263 (6th Cir. 1988) ("A policeman . . . is under no obligation to give any credence to a suspect's story nor should a plausible explanation in any sense require the officer to forego arrest pending further investigation if the facts as initially discovered provide probable cause."); Fisher, supra note 32, at 30 (noting, during a discussion of his examination of police reports, that none of the training materials that he examined addresses "the importance of investigating, reporting, or recording exculpatory facts" and that instead they "reflect a psychological set in which the arrestee's guilt is presumed, and the only use of notes and reports in the criminal process is to ensure conviction"); Givelber, supra note 34, at 1374 ("Police investigations and reports are incomplete and, generally, police do not consider it their obligation to discover, investigate and record exculpatory matters."). But see Bigford v. Taylor, 834 F.2d 1213, 1216 (5th Cir. 1988) ("As a corollary . . . of the rule that the police may rely on the totality of facts available to them in establishing probable cause, they also may not disregard facts tending to dissipate probable cause." (footnote omitted)).

\textsuperscript{52} See Harmon, supra note 25, at 341 ("The vast majority of arrestees . . . are arrested for petty offenses en masse, often without probable cause."); Natapoff, supra note 5, at 1331 ("A growing literature indicates that urban police routinely arrest people for reasons other than probable cause, that high-volume arrest policies such as zero tolerance and order maintenance create a substantial risk of evidentiarily weak arrests, that mechanisms for checking whether arrests are based on probable cause are sporadic, and finally that, if those mechanisms do kick in, police sometimes lie about whether there was sufficient evidence for an arrest.").

\textsuperscript{53} See Shapiro, supra note 9, at 43.

\textsuperscript{54} Gold et al., supra note 42, at 1622 n.57 (citing Fed. R. Crim. P. 11); see also Gregory M. Gilchrist, Plea Bargaining, Convictions and Legitimacy, 48 AM. CRIM. L. REV. 143, 165 (2011). Note that some states have not adopted the "factual basis" requirement. See Shapiro, supra note 9, at 42 n.72.

\textsuperscript{55} See Ortman, supra note 5, at 564 ("In a typical guilty plea, the defendant solemnly admits in open court that he is guilty of the crime charged, and a judge finds a 'factual basis for the plea.'" (footnote omitted)); id. at 564 n.302 ("A third pleas, in which the defendant pleads guilty without confessing guilt, are an uncomfortable exception.").

\textsuperscript{56} See Erica K. Beutler, A Look at the Use of a Guilty Conduct in Sentencing, 88 J. CRIM. L. & CRIMINOLOGY 809, 843 (1998) ("When the legislature statutorily classifies specific conduct as criminal, it can only punish that behavior by recourse to the criminal justice system established by the Constitution. A conviction is a necessary prerequisite to punishment based on that conduct. While not always an accurate barometer of factual guilt, conviction symbolizes legal guilt, thereby legitimizing the government's authority
finding of legal guilt, and thus to the imposition of punishment: a prosecutor must first decide to file a charge; if a prosecution begins, defense is supposed to follow, ideally involving effective defense counsel, as well as things like defense investigation, defense strategies, and the possible mounting of defenses.57

II. THE FUSION OF ARREST AND GUILT

If it seemed obvious that an arrest is distinct from guilt, whether legal or factual, then it may be surprising that the concepts of arrest and guilt often appear to be fused. The extent of this fusion demands explanation and merits concern. This Part lays out a variety of indications of such a fusion before Part III suggests some explanations and Part IV addresses one particularly urgent set of concerns.

A. Consequences of Arrest

An arrest brings what Adam Gershowitz calls “a huge litany of consequences for the arrestee.”58 Many of them appear to rely on an assumption of criminal guilt, and this Subpart presents several of these, including consequences imposed through law by the government, consequences imposed privately, and stigma imposed through both governmental and private acts.

The legal consequences of arrest that appear to rely on an assumption of guilt (or an assumption that one’s likelihood of guilt is far higher than the low threshold that probable cause represents) are numerous. They include a permanent record that is accessible to the police and to others,59 violations of

57. See Jain, supra note 8, at 820 (“Criminal procedure is intended to place important safeguards between a police officer’s decision to make an arrest and its subsequent consequences. Defendants in criminal cases have the right to constitutionally adequate counsel, the right to suppress evidence that was illegally obtained, and the right to cross-examine witnesses, including testifying police officers.” (footnotes omitted)).

58. Gershowitz, supra note 21, at 1530 (mentioning “incarceration, the need to post bail, internet-accessible arrest records, mug shots, immigration and housing consequences because agencies track arrest records, the prospect of job loss because of incarceration, and difficulty in finding new work because of arrest records”). Harmon points out that an arrest can also “affect child custody rights, it can trigger deportation, and it can get a suspect kicked out of public housing.” Harmon, supra note 25, at 314. Jain notes that an arrest can subject students at schools and universities to discipline. Jain, supra note 8, at 812.

59. See Jain, supra note 8, at 823 (“Absent robust sealing laws, police departments and others may widely disseminate criminal records, including arrests that did not result in conviction.”); id. at 824 (“Every state now either requires or permits criminal histories to be released to noncriminal justice agencies, such as those that grant licenses and provide social services. Commercial vendors also collect, store, and search arrest information. A number of states make arrest information publicly accessible, and some allow anyone who pays a fee to access an individual’s criminal history. And the Federal Bureau of Investigation’s
probation and parole, occupational license suspension, civil asset forfeiture, bars on public benefits, and threats to child custody. An arrest on one's record can make one ineligible for jury service. It can also make one ineligible for legal relief, as exemplified by a New York case in which a judge dismissed misdemeanor charges in the interests of justice for those defendants who had no arrest record, but declined to dismiss for those who had such a record. Referring to the arrest records as "record[s] of prior unlawful activity," the judge explained his dichotomous decision: dismissal was appropriate where the defendants had previously led "a law abiding life," but in cases "where a defendant previously has had or exercised that opportunity, but has thereafter again disregarded the law, a different matter is presented. Defendants whose criminal records or records of prior unlawful activity thereby present a history of disregard of the law, will not be permitted to benefit" from dismissal.

Privately imposed deprivation that appears to stem from an assumption of guilt following arrest includes adverse employment consequences. These consequences can include refusals to hire, disciplinary actions, suspensions, and refusals to hire. Employers who conduct background checks may be reluctant to hire someone with an arrest record, even if the charge was later dismissed. This is because employers may assume that the person is guilty of the crime for which they were charged. This assumption of guilt can have a negative impact on the person's ability to find employment, even if they are ultimately found innocent of the charges.

(FBI's) fingerprint database—which was designed to provide law enforcement officials with the criminal histories of arrested individuals—has long been used outside the criminal justice system, such as by employers who conduct background checks. (footnotes omitted)).

60. Id. at 825.
61. See id. at 840 ("As a matter of due process, a licensee may be entitled to a hearing before a license is revoked, but not necessarily before an unpaid license suspension. Until 2006, New York City taxi drivers, for instance, had their licenses automatically suspended for a wide range of arrests, including misdemeanor welfare fraud or forgery." (citing Nnebe v. Dause, 644 F.3d 147, 159 (2d Cir. 2011) ("We think that in any given case, an arrest for a felony or serious misdemeanor creates a strong government interest in ensuring that the public is protected in the short term, prior to any hearing [for an arrested taxi driver].").))
62. See id. at 819 ("Arrests can ... give police officers the opportunity to respond to incentives that have little to do with crime control—such as seizing property through civil forfeiture laws or responding to arrest quotas.").
63. See id. at 825.
64. Harmon, supra note 25, at 314.
65. See Dobyne v. State, 672 So. 2d 1319, 1330–31 (Ala. Crim. App. 1994) (not plain error to excuse a prospective juror on the basis of an arrest, where state's exclusion statute requires that one be "generally reputed to be honest and ... esteemed in the community for integrity, good character and sound judgment").
66. See, for example, New York's Adjournment in Contemplation of Dismissal (ACD), which permits delayed dismissal (and sealing) as long as one is not arrested in the interim. See Kohler-Hausmann, supra note 3, at 648.
69. Id.
70. Id.
72. Ross, supra note 71, at 260 n.140.
73. See Benjamin Levin, Criminal Employment Law, 39 CARDozo L. REV. 2265, 2287 (2018).
Finally, arrests can lead to stigmatizing acts by both governmental and private entities. These acts include publication of arrests in print and electronic media, including the distribution of "mug-shots" and the phenomenon of the "perp walk": the parading of an arrestee by law enforcement, frequently in coordination with members of the media. "Perp" is, of course, short for "perpetrator," and both the act and the terminology used to describe it suggest an assumption that an arrest equals guilt. As JaneAnne Murray puts it, "[t]his walk is an embodiment of the presumption of guilt, and the criminal justice system’s faith in the screening role police officers play in separating the culpable from the innocent."

In light of these consequences, one may wonder about the extent to which the doctrinal prohibition on pre-conviction punishment is honored. Indeed, the law sometimes seems to acknowledge that the criminal process can inflict punishment in advance of adjudication. Thus, for example, when New York established its groundbreaking standards for judges to apply when

74. See Jain, supra note 8, at 815 ("Employers may suspend or fire an arrested worker, even when prosecutors or judges determine that a rogue police officer made a false arrest.").
75. See id. at 812.
76. See id. at 840 ("Some employers suspend or terminate at-will employees based on the arrest.").

DAILY NEWS (Mar. 23, 2017), http://www.nydailynews.com/new-york/white-supremacist-killer-planned-carnage-times-square-article-1.3006719 (Jackson was led into court wearing a white Tyvek suit for a second straight day, with his hands cuffed and his feet shackled.").
78. See François Quintard-Morénas, The Presumption of Innocence in the French and Anglo-American Legal Traditions, 58 AM. J. COMP. L. 107, 147 (2010) (referring to a New York Post front page showing "an accused in shackles with the headline 'Monster in Chains,'" and noting that "the distinction between accused persons and convicted offenders has become staggeringly blurred in the United States").
80. See JaneAnne Murray, A Perfect Prosecution: The People of the State of New York v. Dominique Strauss-Kahn, 8 CRIM. L. & PHIL. 371, 373 (2013) (Strauss-Kahn experienced the presumption of guilt in the early stages following his arrest, most memorably in a humiliating ‘perp walk,’ the prosecutors’ opposition to bail, and the swift decision to indict."); id. at 378 ("There are . . . few countries that subject high-profile arrestees to the humiliation of the ‘perp walk.’ Rightly condemned worldwide as abhorrent to the ethos of the presumption of innocence, the images of Strauss-Kahn paraded in handcuffs carried enormous potential to sear him in the public’s imagination as guilty. These events are not accidents; they are orchestrated as a reward to the investigating officers." (footnote omitted)).
81. See Ryan Hagglund, Constitutional Protections Against the Harms to Suspects in Custody Stemming from Perp Walks, 81 MISS. L.J. 1757, 1767 (2012) ("Perp walks are a natural outgrowth of the symbiotic relationship between law enforcement and the media. Accordingly, the police often assist the media’s efforts to obtain images of a suspect in custody." (footnote omitted)); id. at 1769 ("In the most egregious instances, the police will stage a perp walk, moving a suspect for a short distance and returning him to the place where he is being held, for no reason other than the creation of an opportunity for the press to observe the suspect being moved while in custody.").
83. Murray, supra note 80, at 378.
deciding whether to dismiss prosecutions in the interests of justice, one of the factors for them to consider was the “punishment already suffered by the defendant.”85 Even when the statutory language changed,86 the factor maintained its relevance in the case law of that state and others,87 with courts freely using the term “punishment” to refer to preadjudication harms, including harms from and related to arrest, such as postarrest confinement.88 Thus, these consequences of arrest, and the ways in which the case law portrays them, hint at a regime in which the arrest represents the adjudicative moment,89 and punishment follows therefrom.90

B. “Recidivism”

The legal definition of “recidivism” is relatively straightforward. It means a return to criminal conduct.91 How to measure recidivism is a much bigger issue,92 particularly given the importance of the concept.93 Experts view recidivism as crucial to both the study of individuals94 and the study of policy

85. People v. Clayton, 342 N.Y.S.2d 106, 110 (App. Div. 1993); see also People v. James, 415 N.Y.S.2d 342, 346 (Crim. Ct. 1979) (“Each of these defendants has been arrested and spent at least some time incarcerated awaiting arraignment. The Court considers this enough punishment to satisfy this element of Clayton.”); Roberts, supra note 67, at 372 & n.330 (discussing these cases).

87. See, e.g., People v. Gragert, 765 N.Y.S.2d 471, 476 (Crim. Ct. 2003) (“Due to the erroneous warrant, the defendant has already suffered a ‘punishment’ far greater than what would have resulted from her conviction in this case.”).

88. See, e.g., State v. Smith, 480 A.2d 236, 239 (N.J. Super. Ct. Law Div. 1984) (dismissing case alleging bubble gum theft where “[t]he consequences which have already attended the arrest of this defendant are more punitive than those which would follow conviction”); People v. Doe, N.Y. L.J., April 6, 1979, at 12 (N.Y. Crim. Ct. 1978) (“The defendant has been subjected to punishment by virtue of his incarceration [sic] from the time of his arrest at approximately 5:40 A.M. on Sept. 22, 1978, until his release from custody upon parole at approximately 8:30 P.M. later that day, a period of about 14 hours.”); id. (stating that post-arrest life “effectively amounted to . . . emotional and psychological incarceration”).

89. Jocelyn Simonson has explored the idea that the setting of bail often marks the true adjudicative moment. See Jocelyn Simonson, Bail Nullification, 115 MICH. L. REV. 585, 585 (2017) (“[F]or indigent defendants, [bail] often serves the function that a real trial might, producing guilty pleas and longer sentences when an individual cannot afford to pay their bail.”).

92. See John Nally et al., Post-Release Recidivism and Employment Among Different Types of Released Offenders, 9 INT’L J. CRIM. JUST. SCI. 16, 20 (2014) (“[F]ive major indicators have been identified as measures of recidivism, including (1) police arrest, (2) a criminal charge for a new offense, (3) a revocation for a new criminal offense, (4) reincarceration, and (5) a court-mandated supervision revocation (e.g., a probation or parole violation).”).

94. See, e.g., Nally et al., supra note 92, at 19 (“Post-release recidivism is regarded as the primary measure of the success of an offender's reentry into the community.”).
Arrests As Guilt

choices; indeed, it has been called "an existential test of the criminal justice system generally." Its importance stems in part from the variety of prescriptions that may be inspired by recidivism data. These include prescriptions about whether, how, and how long society should punish; what if any rehabilitative or reentry programs should be funded or offered; how probation and supervised release should function; how bail and pretrial detention should be used; whether "diversionary and treatment programs" are working; how policing should happen; and so on.

Certain knowledge of recidivism can be as elusive as certain knowledge of factual guilt—indeed, more so, because one would need to know about at least two instances of criminal conduct per person ((1) the initial criminal conduct, and (2) the return to criminal conduct). Therefore, those wishing to

95. Petersilia, supra note 91, at 382 ("Reducing recidivism . . . is one of the most important goals of the criminal justice system."); Laura Ravinsky, Reducing Recidivism of Violent Offenders Through Victim-Offender Mediation: A Fresh Start, 17 CARDOZO J. CONFLICT RESOL. 1019, 1026 (2016) ("Recidivism analyses serve a critical societal role by allowing researchers to determine whether resources are being used efficiently and appropriately.").

97. See U.S. SENTENCING COMM’N, THE PAST PREDICTS THE FUTURE: CRIMINAL HISTORY AND RECIDIVISM OF FEDERAL OFFENDERS 2 (2017) ("Recidivism information is central to three of the primary purposes of punishment as described in the [Sentencing Reform Act]—specific deterrence, incapacitation, and rehabilitation—all of which focus on prevention of future crimes through correctional intervention."); id. ("Considerations of recidivism by federal offenders were also central to the [Sentencing] Commission’s initial work in developing the Guidelines Manual’s criminal history provisions . . . and continue to be a key consideration in the Commission’s work today. Recent developments, particularly public attention to the size of the federal prison population and the cost of incarceration, have refocused the Commissioner’s interest on the recidivism of federal offenders.") (footnote omitted)); id. ("Recidivism measures can provide policy makers with information regarding the relative threat to public safety posed by various types of offenders, and the effectiveness of public safety initiatives in (1) deterring crime and (2) rehabilitating or incapacitating offenders.").

99. See Nora V. Demleitner, How to Change the Philosophy and Practice of Probation and Supervised Release Data Analysis, Cost Control, Focus on Reentry, and a Clear Mission, 28 FED. SENT’G REP. 231, 232 (2016) (describing “reduction of recidivism” as “the apparent goal of the efforts to improve supervisory mechanisms”)

100. See U.S. SENTENCING COMM’N, RECIDIVISM AMONG FEDERAL OFFENDERS: A COMPREHENSIVE OVERVIEW 7 (2016) ("Recidivism measures are used by numerous public safety agencies to measure performance and inform policy decisions and practices on issues such as pretrial detention, prisoner classification and programming, and offender supervision in the community.").

101. Nora V. Demleitner, Judicial Challenges to the Collateral Impact of Criminal Convi tions: Is True Change in the Offing?, 91 N.Y.U. L. REV. ONLINE 150, 164 (2016) ("Recidivism has become the hallmark of release decisions and of judging the success of diversionary and treatment programs.").

103. See John Pfaff, @JohnFPfaff, TWITTER (June 21, 2017, 10:58 AM) ("None of our recidivism stats actually measure it, whatever ‘recid’ is. They measure CJ contacts (arrests, etc.), not actually offending.").
measure recidivism rely on proxies. Conviction and incarceration are commonly used as proxies for criminal conduct in the recidivism context.\footnote{104} So too, at least in this country, is arrest.\footnote{105}

While this Article focuses on the complexities of using arrest, it is worth noting that each proxy has flaws.\footnote{106} Conviction, for example, might seem like the best candidate, given that it denotes legal guilt. However, the usefulness of conviction rates to signify rates of “reoffending” is complicated by the influence of disparities in law enforcement.\footnote{107} Convictions may also be an overinclusive measure of factual guilt,\footnote{108} thanks to, for example, the coercive pressure to take a guilty plea,\footnote{109} rules that chill defendants’ trial testimony,\footnote{110} bias among jurors (and others),\footnote{111} the inadequacy (including inadequate re-
sources\textsuperscript{112} and excessive caseloads\textsuperscript{113} of much defense representation,\textsuperscript{114} and restrictions on investigation\textsuperscript{115} and discovery.\textsuperscript{116} The risk of overinclusiveness applies to trial convictions;\textsuperscript{117} it may apply still more forcefully to guilty pleas.\textsuperscript{118} Convictions are also often said to be an underinclusive measure of factual guilt,\textsuperscript{119} as in this discussion by Joan Petersilia of important precautions to be taken by “those undertaking recidivism research, reviewing it, or comparing or reporting it”\textsuperscript{120}:

\textsuperscript{112} See William J. Stuntz, The Pathological Politics of Criminal Law, 100 Mich. L. Rev. 505, 570 n.242 (2001) (“Legislatures . . . fund appointed defense counsel at levels that require an enormous amount of selectivity—counsel can contest only a very small fraction of the cases on their docket, and can investigate only a small fraction of the claims their clients might have.”).

\textsuperscript{113} See, e.g., Nat’l Assn. of Criminal Def. Lawyers, Minor Crime, Massive Waste: The Terrible Toll of America’s Broken Misdemeanor Courts 9 (2009) (“In Chicago, Atlanta and Miami, defenders carry more than 2,000 misdemeanor cases per year. With these massive caseloads, defendants have to resolve approximately 10 cases a day—or one case every hour—not nearly enough time to mount a constitutionally adequate defense.” (footnote omitted)).

\textsuperscript{114} See Strickland v. Washington, 466 U.S. 668, 710 (1984) (Marshall, J., dissenting) (“Seemingly impregnable cases can sometimes be dismantled by good defense counsel.”); Mary Sue Backus & Paul Marcus, The Right to Counsel in Criminal Cases, a National Crisis, 57 Hastings L.J. 1031, 1036 (2006) (“We now have evidence that overworked and incompetent lawyers contribute to wrongful convictions and that truly well-prepared defense lawyers, with adequate support services, can attack the other causes of wrongful convictions, such as mistakes in eyewitness identifications and insufficient investigations.”); William S. Geimer, A Decade of Strickland’s Tin Horn: Doctrinal and Practical Undermining of the Right to Counsel, 4 WM. & MARY BILL RTS. J. 91, 93 (1995) (“In 1984, Strickland v. Washington effectively discarded Gideon’s noble trumpet call to justice in favor of a weak tin horn. Directly contrary to its rhetoric in Strickland, the Court has effectively ensured that Gideon guarantees little more than the presence of a person with a law license alongside the accused during trial.” (footnotes omitted)).

\textsuperscript{115} See Andrew D. Leipold, Why Grand Juris Do Not (and Cannot) Protect the Accused, 80 Cornell L. Rev. 200, 277 (1995) (“[A] defendant who lacks the resources to investigate or to hire experts and consequently doubts his ability to establish an affirmative defense or rebut the prosecution’s evidence may prefer whatever benefit is offered in a plea bargain over the risks of trial.”).

\textsuperscript{116} See, e.g., Murray, supra note 80, at 384 (“[S]uppression or late disclosure of Brady material is a recurrent problem nationwide and in New York State courts.”); B. Michael Dann, Free the Jury, 23 Litig., Fall 2016, at 5, 6.

\textsuperscript{117} Cf. Givelber, supra note 34, at 1386, 1396.

\textsuperscript{118} See John H. Blume, The Dilemma of the Criminal Defendant with a Prior Record—Lessons from the Wrongfully Convicted, 5 J. Empirical Legal Stud. 477, 496 n.70 (2008) (“There are many reasons to question whether many defendants are in fact guilty of the underlying offense. For example, due to jail overcrowding and large criminal dockets in major metropolitan areas, many defendants plead guilty in order to obtain their immediate release or to get to a less restrictive custodial environment rather than spending a substantial amount of time in a local jail awaiting a trial date.”); Mayson, supra note 3, at 536 (“[S]ome number of defendants plead guilty only because they are detained.”); Zeigler, supra note 42, at 689 (“[D]efendants plead guilty for many reasons not related to guilt, and the charge pled to may not be the crime actually committed.”) (footnote omitted); id. at 689 n.297 (“Guilty pleas may be coerced by threatening lengthy incarceration or high bail if a defendant asserts her innocence, while offering a short sentence or even probation if the defendant pleads guilty.”).

\textsuperscript{119} See Mia Bird & Ryken Grattet, Realignment and Recidivism, 664 Annals Am. Acad. Pol. & Soc. Sci. 176, 183 (2016) (“Reconviction is a conservative measure of recidivism because it omits criminal activities for which there is insufficient evidence or any number of reasons for abandoning a prosecution.”).

\textsuperscript{120} Petersilia, supra note 91, at 384–85 (offering a kind of “checklist” for those “undertaking recidivism research, reviewing it, or comparing or reporting it,” which involves “specifying exactly the dimensions that will be used in calculating the recidivism rates,” including the “type of recidivism event”).
It is critical that the particular type of recidivism event be specified, although there is no agreement on which type of event is the best measure of recidivism. Some have argued that recidivism is best measured closest to the event (at arrest), since later events take us further away from the offense itself and so many arrests fail to result in conviction—leading to an underestimation of recidivism. But others argue that convictions are a more appropriate measure, since many arrests are unfounded and the definition of arrest differs so widely from one jurisdiction to another.121

In work that uses rearrest as a proxy for recidivism, one does sometimes find the kind of careful and explanatory approach that Petersilia recommends. Some authors acknowledge the imperfections of arrests as a measure of recidivism, compare those imperfections to the flaws that are inherent in other measures,122 and then explain their decision to use arrest rates (perhaps in conjunction with other measures), with caveats attached.123

But in other instances, one finds references to recidivism that suggest the same kind of unquestioned fusion of arrest and guilt that is described elsewhere in this Article. Sometimes this fusion appears in explicit (but unsupported) assumptions. In a report on “Federal Child Pornography Offenses,”124 for example, the Sentencing Commission defined “known recidivism” to include arrests, even where the disposition of the case is unknown.125 The Commission stated that its study, “like other studies, assumes that false arrests are exceptional and that the typical arrest of an offender on supervision reflects recidivism (including ‘technical’ violations of the conditions of supervision).”126

121. Id. at 384.
122. See Laura M. Baber & Mark Motivans, Extending Our Knowledge About Recidivism of Persons on Federal Supervision, 77 Fed. Probation 23, 23 (2013) (justifying decision to use rearrest as a primary outcome measure in part because “unlike convictions, arrests are more available in automated criminal history records”).
123. See, e.g., U.S. SENTENCING COMM’N, supra note 100, at 7 (“Recidivism is typically measured by criminal acts that resulted in the rearrest, reconviction, and/or reincarceration of the offender over a specified period of time. These are the three recidivism measures used in this report. . . . [M]any arrests do not ultimately result in a reconviction or reincarceration for reasons relating to procedural safeguards (e.g., the suppression of evidence for an unconstitutional search or seizure), lack of sufficient evidence to convict or revoke, and prosecutorial or judicial resource limitation. . . . Even using the least restrictive measure, rearrest, does not count the full extent of offender recidivism, as many crimes go unreported to police or, if reported, do not result in an arrest.” (footnote omitted)).
125. Id. at 296 n.17.
126. Id. “‘Technical’ violations of supervision encompass a wide range of behavior, including absconding from supervision, refusing to participate in mental health or substance abuse treatment, and failing drug tests. In addition, sex offenders typically are subject to additional restrictions, such as prohibitions on associating with minors or frequenting places where minors regularly appear, and accessing the Internet without permission.” Id. at 297. Note that recidivism figures on arrest often include not only arrests for alleged crimes, but also “arrests for alleged violations of supervised release, probation, or state parole.” U.S. SENTENCING COMM’N, supra note 100, at 7. A parole violation is “generally something that is not a crime for anyone who is not on parole—things like going to a bar or visiting a friend who’s also an ex-felon.” Ira Mark Ellman & Tara Ellman, “Frightening and High”: The Supreme Court’s Crucial Mistake About Sex Crime
More often, an assumption that an arrest equals guilt goes unstated in sources that refer to rearrest as recidivism without caveat, despite the differences between arrest and both factual and legal guilt. This can occur in primary research or in secondary sources that fail to mention the fact that the recidivism data being discussed is based in whole or in part on arrest. When viewed in combination with the other data that this Article describes, this apparent lapse in careful sourcing and critical analysis may be explained by an underlying pull to fuse arrest with guilt, such that the need to identify and describe the underlying data is overlooked.

Since recidivism consists of criminal behavior followed by further criminal behavior, arrests can be—and are—used as a proxy for either initial criminal behavior or subsequent criminal behavior, or in some instances both. Arrests appear fused with initial criminal behavior in assertions that judges considering whether to set bail—on a legally innocent defendant—need to consider the risk of “further offenses,” or in assertions that those diverted from the criminal justice system (before guilt is determined) may “recidivate,” or in language that lumps “arrestees” into the family of “offenders”; in the words of one article, “in terms of offenders’ likelihood to engage in future criminal conduct, it makes little sense to separate those offenders who have only arrests from those who have convictions.”

Arrests appear fused with subsequent criminal behavior when those arrested after prison are described as “recidivists.” These sources equate arrests with “criminal acts,” “antisocial behavior,” “misbehavior,” or “miscon-
duct,"136 despite the many factors that can lead to an arrest in the absence of crime commission.137 One article even talks about arrests being “committed.”138 In these sources, record-of-arrests-and-prosecution sheets (“RAP sheets”) are given credence as accurate indicators not only of arrests but of criminal conduct lying behind those arrests.139 Indeed, the words “arrest” and “crime commission” are sometimes used interchangeably, as in this article on “recidivism of prisoners”: “Some released prisoners crossed State lines and committed new crimes. For example, some of the prisoners released in Delaware in 1994 were arrested for new crimes in Pennsylvania in 1995 . . . .”140 Arrests appear fused with both initial and subsequent criminal behavior in sources that detect “recidivism” in the scenario where participation in diversionary programs (absent a conviction) is followed by rearrest.141

Thus, in numerous writings on recidivism, one sees arrests being used, without caveat or analysis, as equivalent to guilt. The concepts seem to be fused142 despite their distinctness and despite the particular need for precision.
when addressing a topic of this importance.

Some notice this. But none seem to have posited an explanation or tied this phenomenon to the other manifestations of an assumption that an arrest equals guilt. This assumption, while always problematic, may be particularly problematic in the recidivism context, given the fact that once one has a criminal record one is particularly vulnerable to re-arrest.

C. Risk-Assessment Tools

Risk-assessment tools are used both to help decide whether to detain or set bail on a defendant preadjudication and to help decide what sentence to impose. In both settings, defendants are vulnerable to fusions of arrests with guilt. And in both settings, the tools are gaining significant popularity. Risk-assessment tools in the preadjudication context are found in about forty jurisdictions and in the sentencing context in more than twenty states.

As Jessica Eaglin points out, most risk-assessment tools used at sentenc-
ing “rely on arrest as the measure of recidivism.”149 Similarly, in the preadjudication context, Sandra Mayson notes that what is described as an assessment of the risk of “new criminal activity” usually equates to an assessment of the risk of arrest.150 Treating arrest as synonymous with criminal activity is one example of a fusion of arrest and guilt, and Mayson lays out some of its weaknesses:

[R]isk assessment tools should stop measuring crime risk in terms of the likelihood of arrest for anything. “Any arrest” is an overbroad proxy for harm. Some eleven million people are arrested each year; their charges range from unpaid traffic fines to murder. One-third of arrests lead to dismissal or acquittal. And members of poor communities of color are disproportionately arrested for low-level crimes.151

Hannah Jane Sassaman echoes some of these concerns, emphasizing the key point that to predict risk in the form of arrest is actually to predict law enforcement activity: “Almost all risk-assessment tools use criminal justice data as proxies for crime. Most forecast future arrest, which is actually predicting law enforcement behavior.”152

The fusion of arrest and guilt appears with respect to past arrests, in addition to future (anticipated) arrests.153 In the sentencing context, past arrests are sometimes factored in to the risk calculation.154 In the bail context, risk-assessment tools may also consider past arrests as indicative of future risk.155 In addition, in the bail context, the existence of a charge in the current case is

149. Eaglin, supra note 16, at 76 (noting, however, that “some variation exists within this principle across tools”).
150. See Mayson, supra note 3, at 509 (“Existing pretrial tools assess the risk of two outcomes: failure to appear (FTA) and rearrest.”).
151. Id. at 562 (footnotes omitted). Rather than repudiating altogether the use of arrest in this context, Mayson reaches the conclusion that “arrest for a serious violent crime” is currently “the best measure available,” and thus proposes its use: “Pretrial risk assessment tools should instead measure crime risk in terms of the likelihood of rearrest for a serious violent crime in the pretrial phase. This measure does not avoid all difficulties. The harm is the actual commission of violent crime. Many people are wrongfully arrested, and many people who commit violent crimes escape arrest. So, arrest for a serious violent crime is still both over- and under-inclusive as a proxy for the commission of violent crime itself.” Id.
152. Hannah Jane Sassaman, Debating Risk-Assessment Tools, MARSHALL PROJ. (Oct. 25, 2017), https://www.themarshallproject.org/2017/10/25/debating-risk-assessment-tools (adding that “[w]e know that certain communities, especially communities of color, are disproportionately over-policed, more likely to be over-charged by prosecutors, and forced into pleas that result in convictions”).
153. See Eaglin, supra note 16, at 97 (“[R]isk tool developers often choose to estimate recidivism risk as chance of arrest based upon factors like prior arrest.”); id. at 98 (arrest data is, thus, used “as both a predictor and an outcome”).
154. Id. at 82–83 (describing a number of tools that use past arrests).
155. See Mayson, supra note 3, at 509 (“Having been arrested before age eighteen might be three points, for example . . . .”). Some, however, have rejected this as a predictor. See, e.g., Schuppe, supra note 146 (“[T]he [Public Safety Assessment’s] developers excluded factors that were predictive but also likely served as proxies for race, such as a person’s arrest history and number of misdemeanor convictions.”).
frequently taken as indicative of guilt. As Mayson puts it, judges assess the risk of “new criminal activity,” thus assuming that there has already been “criminal activity” and thus provoking due process concerns.

D. Linguistic “Slips”

In at least some instances, “recidivism” is consciously chosen to denote the rearrest of someone with a criminal record; other terms that are sometimes consciously deployed in a way that fuses arrest and guilt include “criminogenic” (when referring to factors that appear to lead to arrest) and “sex offender” (when describing someone arrested for a “sex offense”). But there are also an array of terms that fuse arrest and guilt in a way that appears unintended. Thus, for example, one frequently finds the terms “offender,” “offense,” “reoffending,” and “crime,” where the legally correct terminol-
ogy would be "alleged" offender/offense/reoffending/crime. Here, as often, language seems to serve as a "window to the unconscious" and, specifically, into an unconscious fusion of arrest and guilt.

E. "Everyone Pleads Guilty"

A final example involves a statistical error. Legal scholars, as well as others, commonly assert that 90 or 95% of criminal cases end in a guilty plea. It is unclear whether those making this assertion are thinking that a "criminal case" begins with an arrest or with a prosecution. Either way, these statements are inaccurate. They mistakenly characterize the percentage of convictions

Social Media, 36 N. ILL. U. L. REV., Summer 2016, at 57, 75 ("[S]uspects likely to reoffend should be charged and prosecuted more aggressively, because those individuals pose the greatest risk to the community.").

164. See, e.g., Dana Houle (@DanaHoule), TWITTER (Mar. 21, 2017, 6:51 AM), https://twitter.com/DanaHoule/status/844184770049392642 (attaching image of headline describing crimes followed by first paragraph describing arrests, and stating that the "[m]ost broke thing in US journalism is headlines, example infinity: headline says crimes, lede says alleged. BIG DIFFERENCE").

165. See Peggy Cooper Davis, The Proverbial Woman, 48 REC. ASS'N B. CITY N.Y. 7, 16 (1993) ("When we are made to realize that, to take a simple example, we use the verb 'to father' to refer to impregnation but use the verb 'to mother' to refer to nurturing, we learn a great deal about the unconscious assumptions we unwittingly continue to make with respect to parenting."); Richard Delgado & David Yun, The Neoconervative Case Against Hate-Speech Regulation—Lively, D’Souza, Gates, Carter, and the Toughlove Crowd, 47 VAND. L. REV. 1807, 1814 (1994) ("Thought and language are inextricably connected. A speaker who is asked to reconsider his or her use of language may begin to reflect on the way he or she thinks about a subject. Words, external manifestations of thought, supply a window into the unconscious. Our choice of word, metaphor, or image gives signs of the attitudes we have about a person or subject." (footnote omitted)).

168. See Adam E. Dervan, Bargained Justice: Plea-Bargaining's Innommce Problem and the Brady Safety-V alve, 2012 UTAH L. REV. 51, 84 ("Today, over 95 percent of defendants in the criminal justice system plead guilty . . . ."); Carrie Menkel-Meadow, Fair and A just Settlement: Uses and Abuses of the Mandatory Settlement Conference, 33 UCLA L. REV. 465, 562 (1985) ("Over 90% of all cases (both civil and criminal) are currently settled and taken out of the system . . . ."); Ellen Yankover Suni, Who Stole the Cookie from the Cookie Jar?: The Law and Ethics of Shifting Blame in Criminal Cases, 68 FORDHAM L. REV. 1643, 1653 n.38 (2000) ("Statistics indicate that over 90% of defendants charged with violent felonies plead guilty."). As Sklansky points out, some just go ahead and say that "everyone pleads guilty." Sklansky, supra note 166, at 487.

169. See John Pfaff (@JohnFPfaff), TWITTER (Oct. 18, 2017, 7:34 AM), https://twitter.com/JohnFPfaff/status/9206934201802866 (pointing out that when people assert that "95 percent of federal and state criminal cases end in a plea bargain," it is unclear whether they are using "case" to mean "prosecution" or "arrest"); Adam Gershowitz (@AdamGershowitz), TWITTER (Oct. 18, 2017, 7:36 AM), https://twitter.com/AdamGershowitz/status/920698862313152 (tweeting in response to Pfaff that "I think the average arrested defendant processed in a jail would think case means arrested").
that are pleas as the percentage of cases that are pleas, and thus they erase something important. The erroneous statistics erase those cases that end in dismissal or acquittal. That is a significant erasure. For example, Gershowitz points out that prosecutors “dismiss a huge number of cases with no conviction being entered.”

Figures representing the percentage of cases ending in guilty pleas vary according to jurisdiction, but however one defines “cases,” they are less than 90%. So, for example, according to one recent study, a little under two-thirds of felony defendants arraigned in state courts in the seventy-five largest counties pled guilty. In D.C. Superior Court, 42% of all defendants pled guilty; 53% had their cases dismissed post-filing. In federal court, where there is a smaller drop-off between prosecution and conviction, the figures diverge less dramatically from the erroneous version, but they still diverge. In 2015, 88% of federal defendants ended their cases with a plea of either guilty or nolo contendere; the percentage of convictions that involved a guilty or nolo contendere plea was 97.5%.

Again, some have noticed this error. Some are annoyed by it. No one

L.J. 683, 696 n.37 (2006) (“[T]his [95% figure] disregards all dispositions that were unilaterally terminated or that were otherwise dismissed.”).

171. Gershowitz, supra note 21, at 1527 & n.6 (citing Bureau of Justice Statistics figures indicating that “prosecutors dismiss twenty-five percent of felony charges” and citing sources in support of the proposition that the rate “is much higher in some jurisdictions”). Cases may also be judicially dismissed. See Sklansky & Yeazell, supra note 170, at 696 n.37.

172. In a 2009 study of large urban counties by the Department of Justice's State Court Processing Statistics project, “[a]mong cases that were adjudicated within the 1-year study period, 66% resulted in a conviction,” and “[n]early all convictions were the result of a guilty plea rather than a trial.” BRIAN A. REAVES, U.S. DEPT OF JUSTICE, BUREAU OF JUSTICE STATISTICS, FELONY DEFENDANTS IN LARGE URBAN COUNTIES, 2009 – STATISTICAL TABLES 22 (2013), https://www.bjs.gov/content/pub/pdf/fdluc09.pdf.

175. See Sklansky & Yeazell, supra note 170, at 696 n.37 (“It is remarkably difficult to get robust statistics on the rate of civil or criminal consensual settlement. The most common mistake is to subtract the percentage of trials from the percentage of filings and thereby arrive at a figure of over 95% of settlements or plea bargains. That is an error because it disregards the circumstance that many civil cases end with dispositive adjudication before trial. Those cases end because of a judicial decision that concludes the case, not because the parties decide to control the risks of adjudication with an agreement. An analogous calculation on the criminal side would put consensual agreements at approximately 95%, but, again, this disregards all dispositions that were unilaterally terminated or that were otherwise dismissed. Our own estimates, for which we claim no great statistical sophistication, put both the rate of plea bargain and the rate of civil settlement at about 60–70% of filed cases—very high but not overwhelming.” (citations omitted)); Adam Gershowitz (@AdamGershowitz), TWITTER (Oct. 18, 2017, 7:30 AM), https://twitter.com/AdamGershowitz/status/920658466596999968 (stating, in response to Jessica Fishko article, that “95% of criminal *cases* do not end in a plea bargain. 95% of convictions do. There is a difference between those two things!!!”); Carissa Byrne Hessick (@CBHessick), TWITTER (Oct. 18, 2017, 7:56 AM), https://twitter.com/
appears to have posited a suggestion as to its cause. The frequency of this mistake—by people who understand the need for accuracy, precision, and appropriate sourcing and who are committed to exposing and deconstructing harmful assumptions about the criminal legal system—suggests that the error is allowed to slip through because it aligns with an assumption that is pervasive, albeit implicit: that a governmental act that requires only probable cause (whether an arrest or a prosecutorial charge) is in fact equivalent to guilt. If one is conditioned to think of a finding of legal guilt as following on from a finding of probable cause, then one may be less likely to double-check figures that suggest the same.

***

As to several of these phenomena, one might proffer explanations such as inattention, sloppiness, or shorthand. Perhaps it could be said, for example, that it’s a little sloppy to refer to “recidivism” data without acknowledging that the metric is rearrest, or to make the plea rate error, or to use “offender” to mean “arrestee.” But sloppiness is more likely to occur when there is no resistance to it. This Article suggests that these many slips, mistakes, and omissions meet with little resistance because of the strength of an underlying assumption (namely, that arrest equals guilt) that facilitates them all. But how to explain that assumption? The next Part turns to that question.

III. POSSIBLE EXPLANATIONS

To be sure, there may be some explanations for the fusion that are unique to a particular context mentioned above. For example, a partial explanation for widespread acceptance of “recidivism” rates that include arrests (and thus that lie on the expansive end of the spectrum) may be a widespread, if implic-
it, belief that certain people (or groups) have a propensity to commit criminal acts.\textsuperscript{179} There are also some potential explanations that have been thoroughly explored in the literature, including “tunnel vision” affecting law enforcement and others.\textsuperscript{180} This Part will focus on explanations that are more broadly applicable and less well explored.

\textbf{A. “A System of Pleas”}\textsuperscript{181}

It may be unsurprising that an arrest, whose core evidentiary requirement is an assertion of probable cause by law enforcement, has come to seem equivalent to guilt, given that our predominant means for declaring guilt—the guilty plea—has as its core evidentiary requirement an assertion of probable cause by law enforcement.\textsuperscript{182}

While of course there is a key distinction between an arrest and (the majority of) guilty pleas, namely that for the latter a defendant is required to make some sort of admission of guilt,\textsuperscript{183} various scholars have pointed out that in light of the coercive pressure to enter a guilty plea,\textsuperscript{184} the “admission” should be seen as little more than a formality,\textsuperscript{185} and indeed a formality that

\begin{flushright}
179. See Roberts, supra note 110, at 2015 (suggesting that part of what sustains the practice of impeaching criminal defendants with their prior convictions is a societal belief in propensity); Ekow N. Yankah, Good Guys and Bad Guys: Punishing Character, Equality and the Irrelevance of Moral Character to Criminal Punishment, 25 CARDOZO L. REV. 1019, 1032–33 (2004).

180. See, e.g., Keith A. Findley & Michael S. Scott, The Multiple Dimensions of Tunnel Vision in Criminal Cases, 2006 WIS. L. REV. 291, 292 (defining “tunnel vision” as “that ‘compendium of common heuristics and logical fallacies,’ to which we are all susceptible, that lead actors in the criminal justice system to focus on a suspect, select and filter the evidence that will ‘build a case’ for conviction, while ignoring or suppressing evidence that points away from guilt” (quoting Dianne L. Martin, Lessons About Justice from the “Laboratory” of Wrongful Convictions: Tunnel Vision, the Construction of Guilt and Informer Evidence, 70 UMKC L. REV. 847, 848 (2002)); id. (“This process leads investigators, prosecutors, judges, and defense lawyers alike to focus on a particular conclusion and then filter all evidence in a case through the lens provided by that conclusion.”).

181. See Murray, supra note 80, at 372 (“The presumption of innocence may be the foundational principle of the American criminal justice system, but the presumption of guilt is its operational force. The US Supreme Court acknowledged this reality in two notable criminal law decisions in 2012, Lafer v. Cooper and Missouri v. Frye, when it described the criminal process as ‘a system of pleas, not a system of trials.’”).

182. See Shapiro, supra note 9, at 43–44 (stating that a summary by law enforcement of evidence providing a “factual basis” for a plea is probably sufficient where it establishes probable cause).

183. See Menna v. New York, 423 U.S. 61, 62 n.2 (1975) (per curiam) (“[A] counselled plea of guilty is an admission of factual guilt so reliable that, where voluntary and intelligent, it quite validly removes the issue of factual guilt from the case.” (emphasis omitted)); North Carolina v. Alford, 400 U.S. 25, 32 (1970) (stating that pleas are typically accompanied by admission of guilt).

184. See John C. Jeffries, Jr., The Liability Rule for Constitutional Torts, 99 VA. L. REV. 207, 226 (2013) (“For all but the simplest crimes, prosecutors can pile up charges to the point where the incentive to plea bargain becomes overwhelming.”).

may make a mockery of a system that is often said to be interested in truth.186

So perhaps it is not that strange, for example, to use “offender” to refer to someone (an arrestee) who might be guilty,187 given that in our system of pleas “offender” (used in the “proper” sense, i.e., to refer to someone who is legally guilty) itself only means that the person convicted might be (factually) guilty.188 This may be particularly true given the centrality of pleas within our legal system: ours is not just a “system of pleas” in the sense that defendants are permitted to (and in large numbers do) take pleas,189 but also a system that, given the current rate of charging and resourcing, relies on pleas in order to continue to operate.190 If this standard and mode of “proof” establishes guilt in the plea bargaining context, it does not seem surprising that it has the same effect earlier in the process. If our system of plea bargaining “short-circuits” the process of determining guilt,191 then perhaps it is unsurprising if we in our assumptions do the same.

186. See Albert W. Alschuler, The Changing Plea Bargaining Debate, 69 CALIF. L. REV. 652, 705 (1981) (“It . . . may seem strange suddenly to seek the virtues of consent at one stage of a stigmatizing, misery-producing, and involuntary proceeding. Indeed, in most nations of the world, although civil disputes are compromised as freely as here, American plea bargaining apparently is regarded as a reductio ad absurdum of our nation’s commercial mentality.”); Bowers, supra note 22, at 1153 (mentioning critics who find that the propensity of defendants facing weak charges to “plead guilty to cheap pleas” has the effect of “under-mining] the system’s central truth-seeking function”); id. at 1171 (“[The criminal justice system] finds something sacrosanct and inviolable— even magical— in the bottom-line accuracy of the defendant’s admission that she behaved (in some fashion) illegally. Institutional actors (who should know better) hold on to this last vestige of an antiquated truth-seeking ideal.” (footnote omitted)); Arthur Rosett, The Negotiated Guilty Plea, 374 ANNALS AM. ACAD. POL. & SOC. SCI. 70, 75 (1967) (“In many courts, the guilty-plea process looks more like the purchase of a rug in a Lebanese bazaar than like the confrontation between a man and his soul.”).

188. See Albert W. Alschuler, Straining at Gnats and Swallowing Camels: The Selective Morality of Professor Bibas, 88 CORNELL L. REV. 1412, 1413-14 (2003) (“The plea bargaining system effectively substitutes a concept of partial guilt for the requirement of proof of guilt beyond a reasonable doubt. It is marvelously designed to secure conviction of the innocent.”); Alschuler, supra note 186, at 703 (“Adjudication is designed to answer the question of which side is correct on a case-by-case basis. Settlement is not designed to answer this question but to produce an acceptable middle ground.”); Talia Fisher, Conviction Without Conviction, 96 MINN. L. REV. 833, 851 (2012) (noting the probabilistic nature of pleas, and stating that “plea bargaining, by and large, adjust sentencing to the level of proof regarding culpability”); Michael Tonry, From Policing to Parole: Reinventing American Criminal Justice in REINVENTING AMERICAN CRIMINAL JUSTICE 3 (Michael Tonry & Daniel S. Nagin eds., 2017) (conducting a comparative review and concluding that “Nowhere else is a guilty plea enough by itself for a conviction; a judge must determine the facts, decide whether the defendant is guilty and of what, and impose a sentence”).

189. Lafler v. Cooper, 566 U.S. 156, 170 (2012) (“[C]riminal justice today is for the most part a system of pleas, not a system of trials.”).

190. See Ortman, supra note 5, at 554.

191. See Alschuler, supra note 186, at 692 (“A prosecutor or defense attorney whose primary concern is to cut corners probably would find a regime of plea bargaining ideally suited to his goals.”); Packer, supra note 42, at 38 (“[A] decision that the defendant will remain in custody once he has been charged may itself induce him to plead guilty, thereby short-circuiting the part of the process concerned with guilt determination and moving directly to the question of ultimate disposition.”).
The hardships caused by the criminal process, including convictions, are so grave that numerous innovators have created mechanisms that aim to avoid some of those hardships. A variety of such innovations, such as diversionary programs, “alternative” courts, and “problem-solving” courts, have been developed, and a significant component of many of them is that participation can ward off the imposition of a criminal conviction and its manifold consequences.

For all the relative advantages that participation in such programs may offer, one trade-off for this escape from some aspects of the criminal process appears to be that certain hardships can be inflicted without what the criminal legal system would (at least in theory) first require—some sort of finding or acknowledgment of guilt. Thus, to be in such a program—even if one has not pled guilty as a condition of participation—is often to be classed as an “offender” and a possible “recidivism” risk and to be seen as in need of “accountability,” rehabilitation, and penance. Thus, by leaping over any
requirements that guilt be established by means of evidence, these programs may help to support a notion that guilt is established at the time of arrest.

The Law Enforcement Assisted Diversion (LEAD) program in Seattle, for example, holds iconic and influential status, in part because it diverts so early—postarrest but pre-booking—in an effort to whisk one away as quickly as possible from certain harms that the criminal process imposes. And yet, this innovation may bring a cost: reinforcement of the fusion of arrest and guilt. LEAD’s website, for example, describes the program like this: “LEAD is a pre-booking diversion program that allows officers to redirect low-level offenders engaged in drugs or prostitution activity to community-based services instead of jail and prosecution.”

C. Fusion of Act with Crime

As mentioned above, proving the commission of an act is typically not enough to prove the commission of a crime. Our criminal codes have been set up to include additional elements, such as mens rea elements, and to provide for numerous defenses. Yet in the assumptions of the police and the pub-

200. For an explanation of the Obama White House’s July 2015 national convening on the LEAD program and praise of the program in a White House blog post, see Roy L. Austin, LEAD-ing the Way to a More Efficient Criminal Justice System, OBAMA WHITE HOUSE: BLOG (July 2, 2015), https://obamawhitehouse.archives.gov/blog/2015/07/02/lead-ing-way-more-efficient-criminal-justice-system. For a 2018 map detailing where in the United States LEAD is being explored, where it is being developed, where it is launching, and where it is currently operating, see LEAD NAT’L SUPPORT BUREAU, https://www.leadbureau.org/ (last visited Feb. 15, 2019).

201. See Anna Roberts, LEAD Us Not into Temptation: A Response to Barbara Fedders’ “Opioid Policing,” 94 IND. J.L. SUPP. 1, 10 (forthcoming 2019).

203. See supra Subpart I.A.

204. See supra note 20, at 1052 (defining the “mens rea requirement” as “the demand that in all but a handful of cases, criminal guilt requires inquiry into what the defendant subjectively, actually intended at the time of the offense”).

205. See Paul H. Robinson, Criminal Law Defenses: A Systematic Analysis, 82 COLUM. L. REV. 199, 203 n.7 (1982) (“Possible bars to conviction include alcoholism, alibi, amnesia, authority to maintain order and safety, brainwashing, chromosomal abnormality, consent, convolution, custodial authority, defense of habituation, defense of others, defense of property, de minimis infractions, diplomatic immunity, domestic (or special) responsibility, double jeopardy, duress, entrapment, executive immunity, extreme emotional disturbance, hypnotism, impaired consciousness, impossibility, incompetency, insanity, intoxication (voluntary and involuntary), involuntary act defenses, judicial authority, judicial immunity, justification, law enforcement authority, legislative immunity, lesser evils, medical authority, mental illness (apart from insanity), military orders (lawful and unlawful), mistake (of law and fact), necessity, official misstatement of law, parental authority, plea bargained immunity, provocation, public duty or authority, reflex action, renunciation, self-defense, somnambulism, the spousal defense to sexual assaults and theft, statute of limitations, subnormality, testimonial immunity, the unavailable law defense, unconsciousness, and withdrawal.”).
and sometimes of legal scholars, establishment of an act (or even an assertion thereof) frequently seems to be taken as establishment of a crime. This phenomenon may contribute to the tendency to equate an arrest with guilt, since the assertion most easily made in support of an arrest is that the defendant committed a particular act.

One commonly sees the act–crime fusion in public discourse. Thus, for example, only some homicides are crimes, and only some criminal homicides are murders. It is not unusual, however, for reporting of homicide rates to betray the assumption that they are crime rates and indeed to refer to them as “murder rates.”

One sees this fusion creeping into legal scholarship, too. For example, among the various definitions given for “factual guilt,” a popular one assigns factual guilt where the defendant “committed the act.” It is noteworthy that this definition has gained so much currency, given that, in and of itself, commission of the act is typically not enough to establish guilt. It is as if there is a concept of crime, for which an act suffices, that is in a constant tussle with our societal decision, via statutory law, to say that more is needed.

If one looks for explanations of this explanation, one can perhaps speculate about the influence of the “innocence movement.” In its first cases, this movement focused on situations in which DNA could establish that law enforcement had the wrong person. The person seeking exoneration was able to say, “That wasn’t me,” “I wasn’t there,” or “I didn’t do it.” This became the emblematic form of a “wrongful conviction” and may have created a corollary risk that the conviction of someone who was there and did appear to

206. See Joseph A. Colquitt, Rethinking Entrapment, 41 AM. CRIM. L. REV. 1389, 1400 (2004) (“For the police and the public alike, the problem is explaining that a difference exists between the fact of the bad act and the finding of guilt necessary to establish culpability.”).

208. See, e.g., Genego, supra note 40, at 845 (an individual is “factually guilty” when she “performed a given act”); Craig Haney, Exoneration and Wrongful Condemnations: Expanding the Zone of Perceived Injustice in Death Penalty Cases, 37 GOLDEN GATE U. L. REV. 131, 135 (2006) (“[Factual guilt] is the actus reus, the physical or behavioral component of the criminal act.”); id. at 136 (“[F]actual guilt is what most laypersons mean when they talk about whether someone is guilty—or in the case of miscarriages of justice and subsequent exonerations, whether an ‘innocent’ person has been wrongly convicted . . . .”); Paul J. Mishkin, Foreword: The High Court, the Great Writ, and the Due Process of Time and Law, The Supreme Court, 1964 Term, 79 HARV. L. REV. 56, 81 n.84 (1965) (“As used throughout this paper, the term ‘factual guilt’ or more simply ‘guilt’ refers to the individual having done the acts which constitute the crime with which he is charged.”).

209. See, for example, the common usage of phrases like “unsolved crimes,” or “unsolved murders.” If we were to be true to legal definitions of crimes and murders, there could be no such thing as an unsolved crime or murder, since it is only in the “solving” that we determine whether there was a “crime” or a “murder.”

have done something would be assumed to be rightful. Thus, the variety and potential robustness of all the many ways of saying that I may have done the act alleged, but I did not commit a crime, are easily obscured. Larry L. Archie, a defense attorney from North Carolina, provoked some chuckles when his billboard advertisement—"Just Because You Did It Doesn’t Mean You’re Guilty"—hit social media, with one commentator stating, "That can’t be real!" But it is real, and his work of reminding us of this reality is valuable.

D. Media Influence

Media can, of course, both reflect and shape public perceptions. When media outlets equate an arrest to guilt, they risk reinforcing this fusion. In one recent example, a Univision headline stated that “Trump publishes list of crimes committed by immigrants: the majority are Latinos who haven’t been convicted.” This headline provoked at least some pushback, on the basis that the list reflected not crimes but arrests.

Two recurring media practices seem likely to fuel the fusion of arrest and guilt. The first involves the “perp walk,” which is a coordinated effort between media and police in which images of a legally innocent suspect being marched from place to place are published, broadcast, or both. Other nations find this practice abhorrent, as they do our other methods of identifying and stigmatizing arrestees.

A second example involves the common media practice of reporting the
content of police accounts as if it were the truth. This includes presenting police accounts of what suspects are alleged to have said as if those accounts were fact, despite documented examples of false police claims about what suspects are alleged to have said and of police mendacity more generally. This media choice echoes, and may fuel, common assumptions about the truthfulness and accuracy of police accounts and of law enforcement more generally. If a police account is seen as the truth, and if acts are commonly assumed to equal crimes, then the police account of an alleged act, which can suffice for the purposes of an arrest, may also be taken as sufficient to establish guilt.

E. Self-Comforting

Assertions and assumptions that serve a self-comforting purpose are

223. See supra notes 32–35 and accompanying text.

more likely to prosper than those that do the opposite, and they may prosper even in the absence of empirical support. Thus, for example, law professors commonly assert that “law professors have the best job in the world.”

In a system in which arrests are disproportionately visited upon poor people of color, and in which arrests lead to stringent and permanent consequences, some of which appear even to judges to resemble “punishment,” it might be self-comforting to assume that those arrested are guilty. (Otherwise, one might have to conclude that we are stymying the life

232. See Mayson, supra note 3, at 553.

233. See Gershowitz, supra note 21, at 1528 (“We should not want arrestees to suffer needless incarceration, expensive bail bonds, embarrassing mug shots, possible job loss, and other consequences of arrest if their cases will ultimately be dismissed outright without conviction.”); Harmon, supra note 25, at 312 (“Unlike many other encounters with the police, a suspect who is arrested and booked faces practical, reputational, and privacy consequences that persist whether or not he is subject to further legal proceedings.”).

234. See supra Subpart II.A.

235. Jerome H. Skolnick, Justice Without Trial: Law Enforcement in a Democratic Society 241 (1966) (“The negation of the presumption of innocence permeates the entire system of justice. . . . All involved in the system, the defense attorneys and judges, as well as the prosecutors and policemen, operate according to a working presumption of the guilt of persons accused of crime.”); Roberts, supra note 110, at 2017 (“[E]ven at the trial stage, to raise the specter of innocence is to make uncomfortable suggestions: not only that law enforcement (both police and prosecution) has made costly mistakes, and that out beyond the courthouse a factually guilty person may be enjoying freedom, but also that an innocent person’s life has been harmed or ruined in all the ways that pre-adjudication process can achieve.” (footnote omitted)). The point suggested in the text is particularly the case if one is less concerned about hardships when they fall on those believed to be guilty. Cf. Radley Balko, Opinion, The Case for Releasing Violent Offenders, WASH. POST (Aug. 14, 2017), https://www.washingtonpost.com/news/the-watch/wp/2017/08/14/the
chances of, stigmatizing, and stripping away the liberty of people on the basis of their race and poverty.) If a desire to self-comfort is indeed operative, then perhaps those people who are erased from the common plea-bargaining statistical error—people whose cases ended without a finding of guilt—are erased because dwelling on their existence and numerosity is troubling. Similarly, a view of the police that associates them with truthfulness and accuracy may be more comforting than the opposite. A view of arrests as acts of the suspect, and thus within the suspect’s control, may be more comforting than the view of arrest as a threat that may be incentivized by factors other than evidence, and that may be visited upon you no matter how you behave.

An additional self-comforting assumption that might be at play is the assumption that there exists a clean binary of “guilty” and “innocent,” “offender” and “not an offender.” Under this binary, guilt is revealed by conduct—the arrest—and thus it exists before the lawyering begins and is not subject to the vagaries of resources or skill. It would be—for some, it is—highly disturbing that one’s chances of being found legally guilty are deeply influenced by the quality (and often the resources) of one’s defense counsel. It may also be unsettling to acknowledge that in some cases factual guilt does not exist in a definitive sense, and that the only real answer one can get on that question is what a factfinder concludes (thus again implicating the quality/resources differential). Some may be tempted to substitute this “maybe-maybe not” or “let’s see what your lawyer can do with that” world—a world in tension with the Supreme Court’s declaration that “[t]here can be no equal justice where the kind of trial a man gets depends on the amount of money he has” for a world of a nice, clean binary, in which it is not money, chance, or legal skill...
that determines your guilt, but rather your misconduct, embodied by your arrest.243

IV. WHY THIS MATTERS

There are various reasons why one might be concerned by a fusion of arrest and guilt.244 This Article highlights just one set of such reasons, selected because of the breadth of its impact. It focuses on a variety of components of our criminal legal system that require urgent reform, and as regards to which the slowness of reform may be a puzzle.245 It posits that reform in these areas requires a robust understanding of the difference between arrest and guilt, and that the depth and breadth of those concepts' fusion might provide at least a partial explanation of the obstacles to reform.

A. Defense Representation

If guilt is commonly seen as something revealed by an arrest—if, in other words, the relevance of the entire part of the criminal process between arrest and adjudication has fallen out,246 and if the law is viewed less as a means by which guilt can be constructed and more as a construct that can be used by defense attorneys to “get their clients off”247—a variety of failings in the area

243. See Erin Murphy, Indigent Defense, CHAMPION, Feb. 2002, at 33, 33 (“In the short time that I have been a public defender, I have learned that most people who ask the ‘how can you’ question have already divided the world into neat categories of ‘us’ and ‘them.’ They assume that ‘those people’ are in fact guilty criminals and therefore undeserving of constitutional protections. Sometimes the ‘us’ and the ‘them’ is simply the speaker’s distinction between the lawless and the lawful, the good citizen and the bad. Often race or economic privilege bolsters the speaker’s confidence that he or she will always be counted among the ‘us.’ Regardless of how the division is justified, however, the ‘them’ is always a group to which the speaker cannot relate, or to which the speaker is confident he or she will never belong. It is also always a group comprised only of the guilty — as though our laws and procedures were just impediments to the efficient adjudication of guilt, rather than the engine through which we determine whether guilt exists at all.”); U.S. DEP’T OF JUSTICE, OFFICE OF JUSTICE PROGRAMS, NATIONAL SYMPOSIUM ON INDIGENT DEFENSE 2000: REDEFINING LEADERSHIP FOR EQUAL JUSTICE vii (2000) (“In the end, a good lawyer is the best defense against wrongful conviction . . . .”).

244. See supra Subpart II.B, for example, for the many potential effects of recidivism calculations that are maximized through the choice to use arrest as a metric.

245. See Andrew M. Siegel, Moving Down the Wedge of Injustice: A Proposal for a Third Generation of Wrongful Convictions Scholarship and Advocacy, 42 AM. CRIM. L. REV. 1219, 1230 (2005) (“The rules and structures of which I speak—indigent defense systems, prosecutorial incentive structures, plea bargaining procedures, docket control mechanisms, etc.—are over-determined candidates for reform campaigns in that they both impose unfairness up front in all criminal cases and lead to the incarceration of innocents on the back end.”).

246. See Ion Meyn, Why Civil and Criminal Procedure Are So Different: A Forgotten History, 86 FORDHAM L. REV. 697, 725–26 (2017) (highlighting the thinness of the center of criminal, as compared to civil, procedure).

247. Entman & Gross, supra note 221, at 96 n.8 (“The defense attorneys, the contending side, are likely viewed as more biased than prosecutors— their job is to try to get their clients off—and thus their claims are likely to be viewed more skeptically.”).
of defense representation may become less surprising. These include government-funded defense resources,\(^{248}\) the standards and policing of attorney performance,\(^{249}\) the incentive structures operating on defense attorneys,\(^{250}\) defender caseloads,\(^{251}\) and—resulting from these—the inability of defense attorneys to meet their ethical obligations.\(^{252}\) James Forman Jr. has commented on the apparent tension between the dire state of public defense and the “scant attention” focused on it in some quarters.\(^{253}\) A fusion of arrest and guilt may make the phenomenon that he notes more understandable because if factual guilt is viewed as something established by arrest, then many or all of the functions of defense counsel may be seen as a waste of money. Who wants to support those who are trying to get people off on a technicality?\(^{254}\)

---

248. See James Forman Jr., Opinion, Justice Springs Eternal, N.Y. TImes (Mar. 25, 2017), https://www.nytimes.com/2017/03/25/opinion/sunday/justice-springs-eternal.html?smprod=nycore-iphone&smid=nytcore-iphone-share&r=1 (“[N]o aspect of our criminal justice system is as overworked and underfunded as public defender services. Of the more than $200 billion that states and local governments spend on criminal justice each year, less than 2 percent goes to public defense. Yet improving indigent defense gets scant attention in the conversation about how to fix our criminal justice system.”); see also Adele Bernhard, Take Courage: What the Courts Can Do to Improve the Delivery of Criminal Defense Services, 63 U. PITT. L. REV. 293, 311 (2002) (“Judges are not likely to order the expenditure of funds to hire lawyers and support staff when convinced of guilt and worried that additional support will only slow the process of adjudication not change results.”).

249. See Bernhard, supra note 248, at 311 (“Courts may have been dissuaded from taking action on Sixth Amendment right to counsel claims by the acknowledged but pervasive belief that anyone who has been arrested is guilty—a belief which inevitably minimizes the significance of all else in the criminal justice system besides the swift resolution of cases. The presumption of guilt is a ‘core belief shared by virtually all personnel who work within the criminal justice system’ and a major hindrance to improving criminal defense services. If judges suspect that everyone arrested is guilty, it is hard to convince them to strike as unconstitutional state-funded criminal defense systems that rush pleas or discourage legal research and creative investigation.” (footnotes omitted) (quoting Givelber, supra note 34, at 1329)); id. at 312 (“The presumption of guilt helps to explain why the Supreme Court formulated an almost insurmountable standard of review for ineffective assistance claims on appeal.”); Rodney Uphoff, Convicting the Innocent: Aberration or Systemic Problem?, 2006 WIS. L. REV. 739, 741–42 (describing assistance of counsel as often involving “little more than counsel’s help in facilitating a guilty plea”).

250. For defense attorney incentives in our system that militate in favor of performing the “minimum amount necessary to convince clients to plead guilty as quickly as possible,” see Tigran W. Eldred, Prescriptions for Ethical Blindness: Improving Advocacy for Indigent Defendants in Criminal Case, 65 RUTGERS L. REV. 333, 351 (2012).

252. See Eldred, supra note 250, at 335 (“[U]nderfunded and overworked public defenders are constantly forced to violate their oaths as attorneys because their caseloads make it impossible for them to practice law as they are required to do.”). They cannot interview their clients properly, effectively seek their pretrial release, file appropriate motions, conduct necessary fact investigations, negotiate responsibly with the prosecutor, adequately prepare for hearings, and perform countless other tasks that normally would be undertaken by a lawyer with sufficient time and resources.” (quoting NAT’L RIGHT TO COUNSEL COMM., JUSTICE DENIED: AMERICA’S CONTINUING NEGLECT OF OUR CONSTITUTIONAL RIGHT TO COUNSEL 7 (2009), http://www.constitutionproject.org/pdf/139.pdf)); Irene Otsuwoeyimni Joe, Systematizing Public Defender Rationing, 93 DENV. L. REV. 389, 396 (2016).

253. Forman, supra note 248.

254. See Jodi F. Bouer & Elizabeth Ortecho, Book Review, 6 B.U. PUB. INT. L.J. 377, 378 (1996) (“Rothwax does not view the defense attorney’s role as any better than the defendant’s since she also serves..."
Who wants to fund smoke and mirrors?  

To the extent that problems exist with defense lawyering that are within defense attorneys' power to ameliorate, the fusion may again have some explanatory weight. Thus, Abbe Smith finds that attorneys' assumptions of guilt underlie "the bad lawyering at the root of many wrongful convictions: feckless or beleaguered lawyers feeling that their client is guilty anyway, so what the hell?"  

A final example concerns the very provision of defense counsel. To some, the failure to provide defense counsel at stages of the criminal process that include arraignment—and during the guilty plea process that arraignment may encompass—is a disgrace. But those who fuse arrest with guilt may reject the idea that defense counsel needs to be provided at such points. And, where defense counsel is provided, those who fuse arrest and guilt may view the model of “meet ‘em and plead ‘em” not as a monstrosity but rather to prevent, distort, and mislead the court from discovering the truth, i.e., her client’s guilt.” (reviewing JUDGE HAROLD J. ROTHWAX, GUILTY: THE COLLAPSE OF THE CRIMINAL JUSTICE SYSTEM (1996)).  

See Michael J. Minerva, Letter, Court Funding in THE FLA. BAR, SEPTEMBER 1, 2008 LETTERS (2008), https://www.floridabar.org/the-florida-bar-news/letters-28/ ("Sen. Victor Crist, R-Tampa, decries the proposed moratorium [by public defenders on taking new cases, as a response to a funding crisis] as grandstanding, saying along the way that most defendants are guilty anyway. No wonder public defenders lack adequate funds when that highly placed legislator has such an outlandish view of the defense function."); Raeder et al., supra note 238, at 19 ("Governments thus view defense services as perhaps necessary evils, but evils nevertheless, leading to cost control as the bureaucracy's overriding concern. After all, [the logic appears to go,] why pay high fees to protect the guilty?"); John P. Gross & Jerry J. Cox, The Cost of Representation Compared to the Cost of Incarceration, CHAMPION, Mar. 2013, at 22, 22 ("The reluctance to adequately fund indigent defense is undoubtedly based on an unwillingness to spend money on attorneys to represent defendants who are perceived as most likely guilty. Providing defendants with representation is therefore seen as a waste of money; attorneys will only delay the inevitable and will make the criminal justice system less efficient."); see generally Murphy, supra note 243.  

Abbe Smith, In Praise of the Guilty Project: A Criminal Defense Lawyer's Growing Anxiety About Innocence Projects, 13 U. PA. J. L. & SOC. CHANGE 315, 327 (2009); see also Rapping, supra note 111, at 1020 ("[T]hrough their subconscious assumptions about their clients, what the evidence against them means, and what consequences are appropriate, defenders can be pushed to accept a lower standard of justice, and to fight a little less aggressively, for their clients of color.").  

See Packer, supra note 42, at 51 ("The assistance of counsel, to the extent that it is available at arraignment, is perfunctory in the majority of cases. Waiver is easily accomplished and widespread.").  

See e.g., ROBERT C. BORUCHOWITZ ET AL., NAT'L ASS'N OF CRIMINAL DEF. LAWYERS, MINOR CRIMES, MASSIVE WASTE: THE TERRIBLE TOLL OF AMERICA'S BROKEN MISDEMEANOR COURTS 17 (2009).  

See Packer, supra note 42, at 48 ("[According to the Crime Control Model,] the general run of criminal defendants are capable of making up their own minds as to whether they want to plead guilty. If a defendant has a lawyer and wants to consult him about the guilty plea, that is proper. But the state should be under no obligation to provide counsel for a defendant at arraignment. All that is required for a plea of guilty is that the defendant understand its nature and consequences in a general kind of way, and that he enter it of his own free will. The judge's duty is to ensure that these conditions are met. It would involve a needless duplication of resources to insist that a defense lawyer as well as a judge must participate in the entry of a guilty plea."); id. at 61 ("The criminal process as it actually operates in the large majority of cases probably approximates fairly closely the dictates of the Crime Control Model.").
Arrests As Guilt

as an efficient way of proceeding. The phrase nicely encapsulates a system in which the period between arrest and adjudication is largely seen as pointless filler, and thus one in which a lack of funding and support for vigorous defense becomes understandable.

B. Preadjudication Suffering

Preadjudication practices, such as bail, seem finally to be getting broad recognition as practices that not only resemble the “punishment” that is forbidden in advance of conviction but specifically punishment for the crime of poverty. But it took a long time.

If one is searching for explanations of how preadjudication practices of this nature have gone on so long and to such adverse effect, it may again be worth considering the assumptions of guilt attaching to those arrested. Jeffrey Manns, for example, notes that the “conventional wisdom of the culpability of anyone that the government has probable cause to arrest goes far towards explaining popular apathy to pretrial detentions and the dearth of remedies for detainees who are not convicted.” This apathy makes sense if, as R.A. Duff suggests, “the defendant is seen as being in fact an offender, who awaits only the formal verdict of the court before receiving the punishment he deserves.” And indeed, if punishment is deserved, one might as well get started as soon as possible, something that our system permits by folding “time

---

262. See Meyn, supra note 246, at 725–26.

265. See Simonson, supra note 89, at 608 (“Even a few days in jail are profoundly destabilizing: defendants experience declines in physical and mental health, and potentially lose wages, jobs, stable housing, and custody of their children.”).

267. Duff, supra note 128, at 120 (adding that “that is why it is so easy (and so revealing) to slide into talking about the danger that the defendant will commit, not ‘offenses,’ but ‘further offenses’ while on bail”).

268. See id. at 119 (“Now pre-trial detention is not (formally) punishment; it does not presuppose that the defendant is guilty of the crime for which he is to be tried (although if the defendant is convicted and sentenced to imprisonment, time spent on pre-trial remand can be counted towards that sentence as ‘time served’).”); Packer, supra note 42, at 39 (“[U]nder the Crime Control Model[,] [t]he vast majority of persons charged with crime are factually guilty[,] . . . [a]nd [f]or all practical purposes, the defendant is a criminal, just because the assembly line cannot move fast enough for him to be immediately disposed of is no reason for him to go free. If he does go free, he may not appear for trial, a risk that is heightened when he has a strong consciousness of guilt and a lively expectation of probable punishment.”).
served” into the formal sentence.269 As Human Rights Watch puts it, “[t]he
time in pretrial detention (as well as in police lockup pre-arraignment)” can
serve as “punishment paid in advance.”270

A lack of concern about pretrial custody has ripple effects. Part of what
justifies speedy trial guarantees is that a limit on the time spent to bring a case
to trial necessarily means a temporal limit on pretrial custody.271 If those held
in custody are assumed to be guilty, then we can see an explanation for the
widespread failure to make speedy trial guarantees meaningful.272 Similarly,
while one might be concerned that pretrial custody helps to bring about
pleas,273 if one assumes that those in custody are guilty, then that may appear
to be not coercion but welcome efficiency.274

C. Police Reform

If the kinds of assumptions mentioned in this Article—that arrests are
tantamount to guilt, that police are truthful, and that police are essential as the
primary mechanism for bringing the guilty to light—are indeed widespread,
then it may be unsurprising how halting reform has been of policing prob-
lems, including racially disparate policing and arrests,275 widespread use of
arrest,276 inappropriate incentives to arrest,277 police untruth,278 and the incen-

269. See Duff, supra note 128, at 119.

272. See, e.g., Benjamin Weiser & James C. McKinley Jr., Chronic Bronx Court Delays Deny
Defendants Due Process, Suit Says, N.Y. TIMES (May 10, 2016), https://www.nytimes.com/2016/05/11/nyregion/chronic-
274. See id. at 38 (“[A] decision that the defendant will remain in custody once he has been charged
may itself induce him to plead guilty, thereby short-circuiting the part of the process concerned with guilt
determination and moving directly to the question of ultimate disposition.”); id. at 39–40 (explaining the
antipathy of the “Crime Control Model” to reducing the rate of pretrial confinement: “The main risk is that
the increased consumption of time required to litigate cases that do not really need to be litigated would put
an intolerable strain on what is already an overburdened process. That consideration alone argues against a
policy that makes pretrial liberty the norm.”).
275. See Tammy Rinehart Kochel et al., Effect of Suspect Race on Officers’ Arrest Decisions,
49 CRIMINOLOGY 473, 498 (2011) (using a meta-analysis to reach the conclusion that, “[o]n average, the
chances of a minority suspect being arrested were found to be 30 percent greater than a White suspect”);
(“Black men are arrested at younger ages and more often than white men for reasons that have as much to
do with racially differentiated exercises of police discretion as with racial differences in offending behavior.
Racial profiling by the police targets blacks and Hispanics and exposes them proportionately more often
than whites to arrest. Police drug enforcement policies target substances that black drug dealers sell and
places where they sell them, resulting in rates of arrests for drug offenses that have been four to six times
higher for blacks than for whites since the mid-1980s.”).
276. See supra note 1 and accompanying text.
277. See supra notes 23–31 and accompanying text.
If arrests are seen as tantamount to guilt, then those who bear the burden of making arrests—and thus of taking control of criminal wrongdoers—are likely to garner esteem and protection. The fusion of arrest and guilt thus may act as an obstacle to reform. Judges, for example, play a role in overseeing police conduct and testimony. But Rodney Uphoff and others have suggested that judicial assumptions of guilt may dilute that power.

This Article also suggests that traveling along with an assumption that an arrest equals guilt is an assumption that a lack of arrest equals a lack of guilt. (It can be hard to make much sense of "recidivism rates" that rely on arrests, or "crime rates" that rely on arrest rates, unless this second assumption is in

278. See supra notes 32–35 and accompanying text.
279. See Rodney J. Uphoff, On Misjudging and Its Implications for Criminal Defendants, Their Lawyers and the Criminal Justice System, 7 NEV. L.J. 521, 543–44 (2007) (“In my view, the attitudinal blinders that many judges possess contribute significantly to the inadequacies of the criminal justice system. Most judges, especially those with prosecutorial experience, presume that most defendants are, in fact, guilty, even though some are, in fact, innocent. This presumption of guilt, pro-prosecution perspective not only affects the manner in which many judges rule on motions, evaluate witnesses, and exercise their discretion, but it also adversely affects the willingness of many judges to police law enforcement agents and prosecutors. Judges tolerate sloppy police work because they do not want to be viewed as micro-managing the police. Judicial reluctance to let the guilty go free has meant a decreased use of the exclusionary rule. Similarly, courts are hesitant to dismiss cases because of Brady violations or take other steps to reign in [sic] prosecutorial misconduct. Finally, even when courts find error, too many errors are deemed harmless. The expanded use of harmless error not only allows questionable verdicts to stand, it does little to discourage misconduct and sloppy practices in the administration of justice.” (footnotes omitted)); Bowers, supra note 22, at 1163 (“[T]here are strong reasons to doubt the efficacy of the exclusionary rule in policing the police. Judges are especially loath to discredit even incredible police testimony if it means raz ing evidence against defendants—especially recidivist defendants—whom judges may already believe are wasting judicial resources by not plea bargaining.”); Andrew E. Taslitz, Slaves No More!: The Implications of the Informed Citizen Ideal for Discovery Before Fourth Amendment Suppression Hearings, 15 GA. ST. U. L. REV. 709, 764 (1999) (suggesting that the fact that "many judges believe that most defendants are guilty" provides one of five reasons why judges are "all too willing to ignore police perjury").
281. Cf., e.g., Petersilia, supra note 91, at 382 (“[Criminal activity in the general population is assumed to be relatively rare.”).
282. See Linda S. Beres & Thomas D. Griffith, Habitual Offender Statutes and Criminal Deterrence, 34 CONN. L. REV. 55, 60 (2001) (“We have no direct measure of the crime rate, but must rely on either the Federal Bureau of Investigation Uniform Crime Reports (“UCR”) or the National Crime Victimization Surveys (“NCVS”). The UCR only shows reported crimes and the NCVS is dependent upon the memory of the individuals surveyed and the method of questioning.”); Jerome G. Miller, From Social Safety Net to Dragnet: African American Males in the Criminal Justice System, 51 WASH. & LEE L. REV. 479, 481 (1994) (“Meanwhile, the FBI Uniform Crime Reports (UCR), upon which the media routinely base their official estimates of crime, inflated both the numbers and the seriousness of the types of incidents reported. Whereas most European nations report their crime statistics on the basis of convictions, the UCR reports are based on complaints or arrests. However, about thirty-eight of every one hundred individuals arrested for a felony either were not prosecuted or had their cases dismissed outright at their first court appearances. This had nothing to do with plea bargains; usually there was not sufficient reason to proceed with the cases.” (footnote omitted)). For spillover effects of these choices, see, for example, Tess Owen & Isabella McKinley Corbo, When Cops Commit Crime: Inside the First Database that Tracks America’s Criminal Cops, VICE NEWS (Sept. 12, 2017), https://news.vice.com/story/police-crime-database, for a discussion of the use of police arrests to populate a database of police “crime”: “We should also bear in mind that an arrest is not equivalent to a conviction. Just as with the general population, officers are presumed innocent until proven guilty.
This second assumption may serve to insulate the police from concerns about disparate enforcement, since it may mean that potential concern about failure to arrest is diluted, just as is potential concern about decisions to arrest.

D. Prosecutorial Reform

Commentators frequently lament a widespread failure by prosecutors to put much meaning into their constitutional and ethical mandate to "do justice." This mandate all too often seems to be interpreted as a mandate to score convictions—in direct contravention of the Supreme Court's indication in Berger v. United States that the interest of the prosecution "is not that it shall win a case, but that justice shall be done." Paul Butler describes this statement, in the current system, as "just words on paper"; others despair of the idea that the "do justice" mandate can ever be made meaningful. One would need, for example, to set up an appropriate incentive system for prosecutors, and that has not yet been done.

An assumption regarding the guilt of those arrested may help elucidate some of these failures. If those arrested are assumed to be guilty, then (for

But Stinson [the creator of a 'police crime database'] thinks looking at arrests is a fair way to examine cop crime, because that's how law enforcement (including the FBI's Uniform Crime Report) collects information on crime in general." id. 283. See Anna Roberts, Impeachment by Unreliable Conviction, 55 B.C. L. Rev. 563 (2014) (discussing the question of whether a criminal record is not just a reliable indicator of culpability but also a reliable indicator of relative culpability).

285. See AM. BAR ASSN., CRIMINAL JUSTICE STANDARDS FOR THE PROSECUTION FUNCTION § 3-1.2(b) (4th ed. 2015), https://www.americanbar.org/groups/criminal_justice/standards/ProsecutionFunctionFourthEdition/ ("The primary duty of the prosecutor is to seek justice within the bounds of the law, not merely to convict.").

289. See Rachel E. Barkow, Organizational Guidelines for the Prosecutor's Office, 31 CARDOZO L. REV. 2089, 2091 (2010) ("[C]onvictions are the lodestar by which prosecutors tend to be judged."); Andrew D. Leipold, The Problem of the Innocent, A Guilty Defendant, 94 Nw. U. L. Rev. 1297, 1328 (2000) ("[E]ven in the absence of bad faith prosecutors have incentives to resolve nagging doubts about a suspect's guilt in favor of prosecution."); Siegel, supra note 245, at 1225 (noting "the failure of our system to develop an incentive structure for prosecutors that rewards the pursuit of justice rather than the pursuit of competitive advantage").

290. See HUMAN RIGHTS WATCH, supra note 270, at 31 (quoting Timothy Murray, then-Executive Director of the Pretrial Justice Institute, as saying that woven into the mindset of prosecutors across this country is "the idea [that] you should somehow 'pay' from the moment of arrest, that you owe the system something just by virtue of being accused . . . because they implicitly believe—and must believe—that people who are arrested are guilty").
those who believe that guilt should be met with a conviction) justice might well be seen as identical to the pursuit of convictions, and incentives that further that pursuit might be seen as beneficial. In addition, if those arrested are assumed to be guilty, then concerns about prosecutorial misconduct are likely to lessen, given the tendency to worry less about misconduct when its victim is thought to be guilty.291

Judges have a potential role in overseeing aspects of the prosecutorial role and curbing its worst excesses.292 But if they too are liable to fuse arrest with guilt, their relative inaction may make more sense.293 Prosecutors, in turn, have a potential role in overseeing aspects of police conduct, screening its output,294 and curbing its worst excesses.295 If they are liable to fuse arrest with guilt,296 their relative failure to play this role may make more sense.297

CONCLUSION

Criminal justice reform is hard. However strong one’s commitment, one faces obvious barriers, whether fear, financing, or resistance to change. This Article has brought to light a less obvious barrier: a widespread fusion of arrest and guilt. If even those committed to criminal justice reform are vulnerable to this fusion, the slowness of reform in areas that rely on a robust understanding of the distinction between arrest and guilt may make more sense.

Yet criminal justice reform is crucial. If, as this Article suggests, the fusion of arrest and guilt is indeed a potent force, we must investigate its many pos-

291. See Balko, supra note 235 (“We want to punish criminals. We want them to suffer. We create hostile prison environments rife with violence, racial resentment and rape.”).

292. See, e.g., Roberts, supra note 67, at 331 (suggesting that judicial power to monitor and regulate prosecutorial conduct is greater than commonly suggested).

293. See Uphoff, supra note 280, at 543-44, 544 n.129 (“Many commentators have highlighted the serious systemic problem of prosecutorial misconduct and criticized judicial inattention to the problem . . . .”).

294. See id.

295. See Daniel S. Medwed, The Zeal Deal: Prosecutorial Resistance to Post-Conviction Claims of Innocence, 84 B.U. L. Rev. 125, 140 (2004) (“The perception, even among prosecutors, that the police only arrest guilty people in the first place reinforces the belief that the right person was charged and later convicted.”).

296. See Natapoff, supra note 20, at 1068 (“With respect to minor offenses, . . . prosecutors in some jurisdictions forgo the screening inquiry and convert arrests into charges more or less automatically. This fact is reflected in low rates at which prosecutors decline cases. In New York and Iowa, for example, Josh Bowers found declination rates for certain minor offenses as low as 2% or less, meaning that 98% of those police arrest decisions converted to criminal charges. A Vera Institute study found similarly low prosecutorial declination rates in misdemeanor drug cases in North Carolina.” (footnote omitted)).
sible explanations. Identifying the fusion, and attempting to understand it, is a necessary precursor to efforts to combat it.
